## ***NEW IN SPORT GLASSES***

### ***ATIII - Factor***

Factor glasses from designers R2 uniquely combine sports functionality with perfect fashion appearance. Factor will serve well during training or race, but also during everyday active life. You can choose from models with different technologies. HD technology with an attractive red -black revo lens, or if you are looking for fully adaptable technology, reach for the Photochromatic version of Factor. Full adaptability is increased by an adjustable beam, so Factor has the potential to suit anybody.

## ***LENS EDGING***

If sunglasses frame suits you so well, that you would like to use it as a prescription glasses, we offer the possibility of EDGING of diopter lenses directly into the frame.

## ***INSERT ATPRX5***

Optical enlarged insert, which applies inside the sunglasses for use with usual sunblock lens. Thanks to bigger size, it ensures more comfortable use.

## ***R2 OPTICAL FRAMES***

### ***MAT102C5 - TRIBAL***

The TRIBAL optical frame combines airy metal parts with a highly durable yet lightweight TR90 plastic. Flexi hinges have been added for maximum comfort. The sporty, yet elegant style of the frame will appeal to all who enjoy an active lifestyle.

## ***BIFOCAL***

### ***AT078 - Crown***

A smart bifocal solution for Crown model lovers, who already need already have some diopeters when reading, we have newly applied to the clear photochromic lenses. A small bifocal field at the bottom of the lens it does not prevent a good view from a distance, but it will help a lot with

## ***WE EXTEND THE LIFE R2 PRODUKTS***

### ***Spare parts***

The R2 team, which creates products related to sports and active lifestyles, perceives the importance of sustainable development for the good state of our environment. The wide range of spare parts for R2 products prolongs their life cycle.

# Photochromatic

The lenses automatically darken / lighten according to the intensity of sunlight.

CLOUDY - CATEGORY 0

PARTLY CLOUDY - CATEGORY 1

SUNNY - CATEGORY 2

SUNNY - CATEGORY 3

**DIABLO**  
AT106C

## PHOTOCHROMATIC

The revolutionary attribute of sports eyewear production. This advanced technology delivers to lenses a high versatility of use substantially in all light conditions. Lenses are able to react very quickly Photochromatic The lenses automatically darken / lighten according to the intensity of sunlight to the current intensity of UV rays and darken / lighten adequately to environment. With this feature glasses provide a high user comfort during all possible lighting conditions, thereby ensures perfect vision.

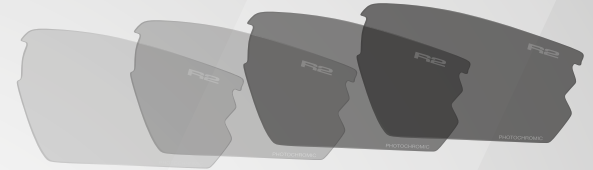

## CLEAR TO GREY

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening and evening against insects or dirt, but during the day it darkens to gray, which renders the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments, for sunny weather as well as for reduced visibility.

## GREY TO GREY

Impact-resistant gray lens, tinting automatically to a darker gray according to the degree of light in the surroundings. Renders the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments, in mild and sharp sun.

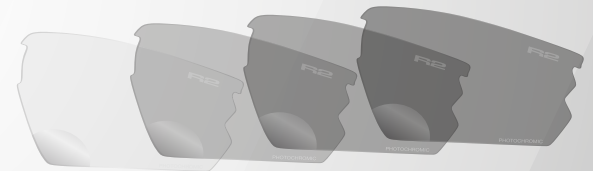

## BROWN TO BROWN

Impact-resistant lens light brown, tinting automatically to a darker brown according to the degree of light in the surroundings. They limit the transmission of the blue component of the light spectrum, thereby distorting the whole impression into a warmer rendering. They increase the transparency of vision by reducing blue light.

## CLEAR TO GREY WITH BIFOCAL

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening against insects, but during the day darkens to gray, which renders individual colors relatively undistorted. At the bottom of the lens there is a mini lens in the range of +1.5, +2 or +2.5 diopters for easier reading of the map, watch, navigation and other devices.

## CLEAR TO GREY WITH BLUEBLOCK

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening against insects, but during the day it darkens to gray, which renders individual colors relatively undistorted.

## ORANGE TO BROWN WITH HD ANTIFOG

Shockproof orange lens, tinting automatically according to the degree of light in the environment to brown. In the deactivated state, they increase the clarity of vision, while in the darkened state, they pleasantly regulate the sharp sunlight. HD technology of special coloring of lenses with a special admixture then ensures the sharpest possible vision in environments for which the lens is purposefully developed, ie on trails and into nature. The ingenious system of water-repellent ANTIFOG layers on the inside of the lenses ensures that the lenses do not fog even during extreme sports performances.

# HD

High contrast lenses  
zvýšující prokreslení obrazu

FOG AND NON-CONTRAST LIGHT

HD TECHNOLOGY

SHARP SUNLIGHT

HD TECHNOLOGY

DEEP SHADOWS

HD TECHNOLOGY

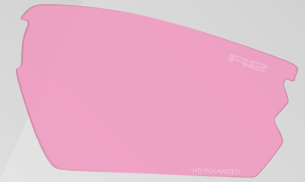

EDGE  
AT101B

HD lens technology increases the vision of specifically selected colors from the natural color spectrum. Thanks to HD lenses, we are able to see key details in a more contrasting environment, which in turn helps the brain respond faster and more accurately. HD technology achieves this by deliberately suppressing colors in the natural color spectrum so that the most important elements in the environment around us stand out clearly and distinctly and are as clear as possible.

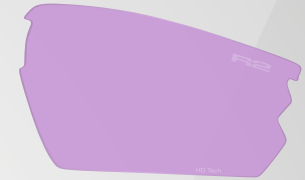

## PINK

Impact-resistant lens with a pink tint. These lenses increase the contrast of vision on a green and blue background, ie in nature, against the sky or on water. HD Tec or high definition technology means extra high definition. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

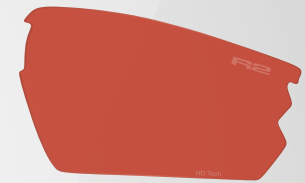

## PURPLE

Impact-resistant lens with purple tint. These lenses increase the contrast of vision on a gray background, especially on the road, in the city. HD Tec or high definition technology provides extra high resolution. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

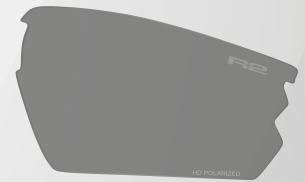

## BROWN-ORANGE

Impact-resistant lenses with a brown-orange color. They increase the clarity of vision. Comfortable and popular with situations and environments with poor visibility. HD Tec or high definition technology provides extra high resolution. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

## SMOKE POLARIZED

Impact-resistant lens with gray smoke color and polarizing filter. These lens colors render the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments. The polarizing layer on the lens reduces the penetration of light reflected from horizontal glossy surfaces. This increases the sharpness and comfort of vision while reducing eye fatigue. HD or high definition is a technology of special coloring of lenses with a special admixture ensuring the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

### SUN FILTER CATEGORY

0

**Category 0:** clear or very light filter  
(visible light transmission 80-100%)

1

**Category 1:** light filter (visible light transmission 43-80%)

2

**Category 2:** medium dark filter  
(visible light transmission 18-43%)

3

**Category 3:** very dark filter  
(visible light transmission 8-18%)

4

**Category 4:** very dark filter (visible light transmission 3-18%).  
Category 4 is not suitable for driving motor vehicles.

Sun filter category

# Onecolor

## SMOKE

Impact-resistant lens with grey smoky tint. These lens colors render the individual colors of the light spectrum relatively undistorted and are thus suitable for all types of environments, but do not excel in any of them.

## BROWN

Impact-resistant lens with brown tint. They limit the transmission of the blue component of the light spectrum, thereby distorting the whole impression into a warmer rendering. They increase the transparency of vision by reducing blue light.

## ORANGE

Impact-resistant lenses with an orange color. They increase the clarity of vision. Comfortable and popular for situations and environments with poor visibility.

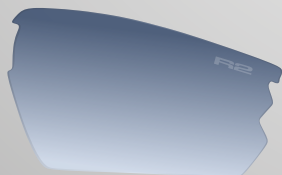

## YELLOW

Impact-resistant lens with yellow color. They fundamentally reduce the blue color of the light spectrum and brighten it the most. It is most often offered as an additional replacement lens.

## CLEAR

Impact-resistant lens with a clear color. Suitable for reduced visibility as eye protection, for example in the early evening and evening against insects or dirt. It is most often offered as an additional replacement lens.

## GRADIENT SMOKE POLARIZED

Impact-resistant polarizing lens with shaded gray-smoke tint. The universal and most popular color, sometimes also called „smoky“. These lens colors render the individual colors of the light spectrum relatively undistorted. The polarizing layer on the lens reduces the penetration of light reflected from horizontal glossy surfaces. This increases the sharpness and comfort of vision while reducing eye fatigue.

### TR90

Extremely lightweight and very durable high-tech material with superior flexibility and shape memory, increased wearing comfort.

### Adjustable temples

Customizable temples improving the fit of the glasses.

### Flexipad

Adjustable for shape. Provides more comfort by wearing, the nose pad can be adjustable to the shape of the nose.

### Photochromatic

Lenses automatically darken / lighten according to the intensity of sunlight.

### Platinum Lenses

Reduce eye fatigue thanks to special abrasion resistant mirror layer which significantly limits light transmittance eyes by simply reflecting most of it.

### XL

Sunglasses for wide face.

### HD

High-contrast lenses to enhance image rendering.

### ImpactProtection

Almost unbreakable lens material provides eye safety.

### XS

Sunglasses for smaller face.

### HD Pol

Polarized high-contrast lenses to enhance image rendering.

### Pro Optic compatible

Optional - removable diopter clip. Sunglasses can be used without clip.

### 100% UV

100% protection against UV radiation A, B, C guarantee.

### Photochromatic HD

Combination of two top lens technologies - photochromatic and high resolution HD.

### Bifocal

Small dioptric field at the bottom of the lens for better reading.

### Soft case

The soft microfiber cleaning pouch protect sunglasses against scratches.

### Polarized

Lenses eliminate annoying reflections, suitable for sport, driving, water activities. Polarization helps eyes to reduce their fatigue.

### Ventilation system

Enables air flow through lenses which protect sunglasses from fogging.

### CE - Safety pro

Certification CE.

### Photopolar

Delivers photochromatic and polarization capability simultaneously.

### NoFrame

Allow unlimited view in all directions even when bending down.

### Designed in CZ

All R2 products are developed and designed in the Czech Republic.

### Xchange view

Sunglasses that can adapt to weather conditions and actual situation by replacing various lenses.

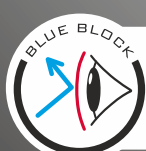

### AntiSlip

Antislip tips and nose pads. Prevent slip sunglasses which perfectly on your face.

### New product

Seasonal news.

### Blue block

Lens filter, eliminating harmful blue light. Reduces fatigue, headaches, has beneficial effects on sleep.

### Antifog

Surface treatment of the inner part of the lens, which reduces the risk of fogging of the lens.

A man with short brown hair and glasses is looking down at a book he is holding. He is wearing a grey hoodie. The background is slightly blurred, showing what appears to be a bicycle wheel. A large red diagonal stripe runs across the left side of the image.

*Optical frames*

# SHARP

*The SHARP optical frame made by R2 delivers a sporty fashion style for everyday use. The TR90 frame material is known from sports sunglasses and is characterized by high durability and shape memory at a very low weight. SHARPE is also suitable for wider faces.*

**MAT101C2** - Sharp  
frame: grey, blue / matt

# TRIBAL

*The TRIBAL optical frame combines airy metal parts with a highly durable yet lightweight TR90 plastic. Flexi hinges have been added for maximum comfort. The sporty, yet elegant style of the frame will appeal to all who enjoy an active lifestyle.*

**MAT102C5** - Tribal  
frame: black, red / matt

**MAT102C1** - Tribal  
frame: blue / matt

**MAT102C2** - Tribal  
frame: blue, red / matt

**MAT102C4** - Tribal  
frame: green, black / matt

# CLERIC

*CLERIC is an optical frame that you can reliably use not only for everyday use, but also for more demanding sports activities. For this purpose, they are provided with non-slip surfaces of the sides and nose pads. Made of highly durable and lightweight TR90 material. Flexibility hinges significantly increase comfort.*

**MAT103C2** - Cleric  
frame: black, red / matt

**MAT103C4** - Cleric  
frame: black, blue / matt

**MAT103C5** - Cleric  
frame: black, orange / matt

# FIELD

*FIELD is a half-frame model that will support you not only during all your sports activities, but also at work or the office, if you do not want to look too sober. It brings the idea of one optical glasses for the whole day. To bring you feeling you don't even know about wearing them, TR90 material and flexes were used, which best combines low weight and high durability.*

**MAT104C3** - Field  
frame: merlot / matt

**MAT104C1** - Field  
frame: white / gloss

# CROSS

ANTIALLERGIC SURFACE

*Are you looking for a serious look? Do you appreciate details in fashion? This is exactly the combination of our full-frame R2 CROSS frame, which is located on the border of the lifestyle and sports model of optical glasses. It uses a light, highly durable TR90 grilamide and temples with flex for more easy wearing. Temple ends finished with rubber for a stable fit on each face.*

**MAT105C1** - Cross  
frame: black rubber, red

**MAT105C2** - Cross  
frame: blue / matt

**MAT105C3** - Cross  
frame: black / matt

# COAL

*The flexible sport frame COAL is made of TR90 material, which is characterized by high durability and shape memory at the same time very low weight. The stylish carbon temples have rubber ends, which will be appreciated especially by athletes during any activity.*

**MAT106C1** - Coal  
frame: black, carbon, blue / matt

**MAT106C2** - Coal  
frame: black, carbon, orange / matt

**MAT106C3** - Coal  
frame: black, carbon, silver / matt

# VAST

*Are you keen in sports and can't find suitable frames for you? Therefore we developed model VAST model just for you. It holds perfectly thanks to the non-slip temples ends and fits everyone thanks to the adjustable rubber nose pads. Flexi hinges have been added for maximum comfort of use.*

**MAT107C1** - Vast  
frame: black, red / matt

**MAT107C2** - Vast  
frame: black, orange / matt

**MAT107C3** - Vast  
frame: blue / matt

# FLICK

*The model FLICK is the result of a unique development of our designers together with our athletes. The shape of sporty frame complemented by adjustable temple tips will satisfy all demands. Made from TR90 material featuring high durability and shape memory while being very lightweight. FLICK is dimensionally suitable for XL faces.*

**MAT111C1** - Flick  
frame: black, orange / matt

**MAT111C2** - Flick  
frame: black, blue / matt

**MAT111C3** - Flick  
frame: black, red / matt

# *Pro Optic Program*

# UNIQUE POSSIBILITY OF OPTIC PROGRAM *CROWN AT078*

## **LENS EDGING**

If sunglasses frame suits you so well, that you would like to use it as a prescription glasses, we offer the possibility of edging of diopter lenses directly into the frame

## **OPTICAL HALF RIM ATPRX2**

Optical half rim ATPRX2 suitable to R2 Crown model, which is fitted directly into the frame. It is characterized by undistorted view and low weight. It can be exchanged for sun lenses if needed.

## ***OPTICAL INSERTS ATPRX***

Versatile Pro Optic inserts ATPRX, which retain all the sunglasses advantages by hanging off the original lens. In addition, the insert can be easily changed between several sports sunglasses. The solution is simple and economically most favorable.

## ***BIFOCAL LENSES***

A smart bifocal solution for those who already need to focus better while reading, we have newly applied to clear photochromic glasses. The small dioptric field at the bottom of the lens does not prevent good view on a distance, but will help a lot when needed to focus closer.

ATPRX	Optical reduction, which is applied from the inside of the frame, to be used with usual sun lens.							
ATPRX2	Optical half rim, to be inserted rightaway to the frame instead of sun lens.							
ATPRX103	Optical half rim as a part of a model AT103. It is possible to edge with higher diopter.							
ATPRX3	Optical reduction, which is applied from the inside of the frame, to be used with usual sun lens. Improves the vision comfort thanks to bigger size.							
ATPRX4	Optical reduction, which is applied from the inside of the frame, to be used with usual sun lens. The advantage of this clip is that it enables a deeper viewing angle.							
ATPRX5	Larger optical reduction to the frame of sports sunglasses Proof, Roket, Diablo.

# DIABLO

125 0 140 base 8

DIABLO are unmissable glasses expressing freedom of design and mind. Thanks to the removable bumper attachments, you become the creator of their appearance yourself and to a certain extent you can change the functionality of the glasses according to your current preferences. For example, you can easily create frameless goggles with a perfect, wide view and protection as partners for covering distant kilometers on a road bike. DIABLO look robust, but thanks to the TR90 material used, they are light. The anti-slip material of the beams and sides then holds the glasses in place even in rough terrain.

# GAIN

Uncompromising sports glasses that will wake up the head peloton racer in you. R2 GAIN, typical for its sharp features, we fitted with similarly shaped, high-contrast HD lenses, with which the surface of asphalt and terrain baits reads well. In addition, the benefits of R2 GAIN can be enjoyed by really everyone, because we made them from the high-strength and flexible TR90 grilamide and used Flexipad technology on the beams, thanks to which the beams can be adapted to the shape of each nose.

# VISION

55 18 163 base 6,5

Are you looking for a matching, sporty cut optical frame for dioptric lenses? R2 VISION, a frame made of our most popular material for sports glasses - the TR90 grilamide, is used for these purposes. Not only is it extremely light. The TR90 also has top strength and flexibility. We designed the VISION spectacle frame to fit you in every sport, thanks to non-slip sides and beams with the possibility of adjustment for every nose shape.

# FACTOR

Factor glasses from the R2 designer workshop uniquely combine sporty functionality with a perfect fashionable look. The factor will serve well during training or the race, but also during normal active life. You can choose from models with different technologies. HD technology with an attractive red-black REVO lens, or if you are looking for a fully adaptable technology, look for the Photochromatic version of Factor. The adjustable beam is further enhanced by the adjustable nosepad, so the Factor has the potential to fit well for anyone.

**ATPRX3** - base 6

**ATPRX5** - base 6

1-3

**AT111B** - Factor

frame: black / matt

lens: photochromatic brown to brown, gold revo

2

**AT111D** - Factor

frame: black, raspberry / matt

lens: grey, red-black revo

0-3
