## ***NEW MODELS IN OPTICAL FRAMES***

### ***MAT112 - Ortis***

In our latest collection of optical frames, we present two brand new and innovative options for your dioptric glasses. ORTIS - for an active lifestyle with XL size and adjustable tips. And TALIC - for stylish everyday wear with a sporty design and high-quality metal.

## ***SMOKE LENSES***

### ***AT063A15 - Racer***

Our bestseller, the smoke lens, is again available in the R2 collection in the CROWN and RACER models. These lenses are very versatile and suitable for all types of environments. They provide excellent visibility and comfort for sports and everyday wear.

## ***OPTICAL HALF-RIM***

### ***ATPRX7***

The ATPRX7 optical half-rim to the bestselling R2 Racer AT063 is a revolutionary improvement that allows direct integration into the frame of the goggle. With less curvature, it allows a wider diopter range while maintaining the lightness and durability of the glasses frame, giving you unlimited freedom during sports activities. In addition, the size is optimized for ease of production, resulting in reduced manufacturing costs.

## ***PRESENTATION OF PRO OPTIC PROGRAM? ALL SOLUTIONS IN ONE BOX!***

Presentation of optical solutions in one elegant box. Introducing a complete range of optical solutions that you can have in one place.

*Box contents include: AT063 Racer Goggles, AT106 Diablo goggles, AT078 Crown glasses with photochromic lens, UV flashlight, Polarization tester, Plastic optical clips ATPRX, ATPRX3, ATPRX4, ATPRX5, Optical reduction ATPRX2, Metal ATPRX6, Metal optical reduction ATPRX7, Lens ground directly into the frame*

We allow you to explore different optical options and show you how photochromic and polarizing lenses work - all in an elegant and presentable design. Your glasses, your choice, your comfort.

## ***HD LENSES***

### ***AT108J - Gain***

The HD lens of the Gain sunglasses is designed specifically for Off Road environments, where it can bring out the details of natural obstacles by enhancing the contrast of their colour tones. This allows you to see better while relieving the strain on your eyes. At the same time, it eliminates the blue light wavelength spectrum (420-440nm) to protect your eyes.

## ***OPTICAL INSERT ATPRX6***

### ***AT111G - Factor + ATPRX6***

The metal optical insert for sports sunglasses ensures high durability and impact resistance. Thanks to the flexibility and adaptability of metal, the clip easily adjusts to the glasses frame, providing a more aesthetic look and allowing more precise fitting of the dioptric lenses for maximum vision and comfort during sports activities.

# PHOTOCHROMATIC

The lenses automatically darken / lighten according to the intensity of sunlight.

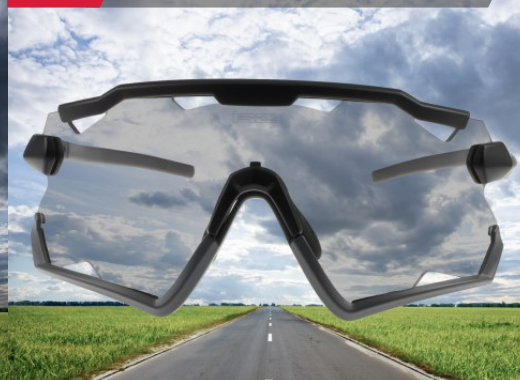

/ 0

CLOUDY - CATEGORY 0

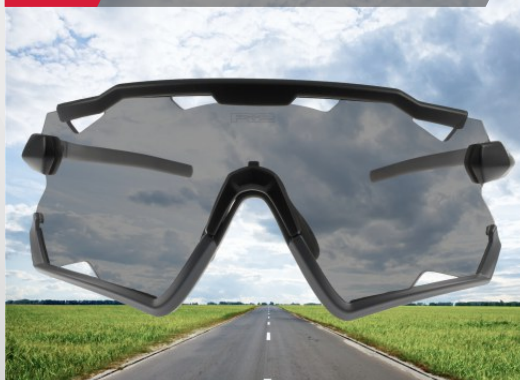

/ 1

PARTLY CLOUDY - CATEGORY 1

/ 2

SUNNY - CATEGORY 2

/ 3

SUNNY - CATEGORY 3

**DIABLO**  
AT106C

PHOTOCHROMATIC The revolutionary attribute of sports eyewear production. This advanced technology delivers to lenses a high versatility of use substantially in all light conditions. Lenses are able to react very quickly Photochromatic The lenses automatically darken / lighten according to the intensity of sunlight to the current intensity of UV rays and darken / lighten adequately to environment. With this feature glasses provide a high user comfort during all possible lighting conditions, thereby ensures perfect vision.

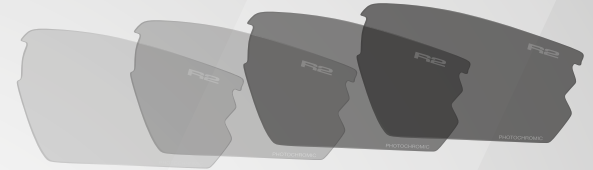

## CLEAR TO GREY

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening and evening against insects or dirt, but during the day it darkens to gray, which renders the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments, for sunny weather as well as for reduced visibility.

## GREY TO GREY

Impact-resistant gray lens, tinting automatically to a darker gray according to the degree of light in the surroundings. Renders the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments, in mild and sharp sun.

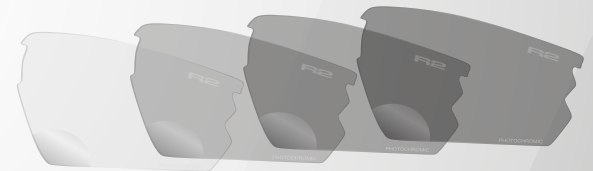

## BROWN TO BROWN

Impact-resistant lens light brown, tinting automatically to a darker brown according to the degree of light in the surroundings. They limit the transmission of the blue component of the light spectrum, thereby distorting the whole impression into a warmer rendering. They increase the transparency of vision by reducing blue light.

## CLEAR TO GREY WITH BIFOCAL

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening against insects, but during the day darkens to gray, which renders individual colors relatively undistorted. At the bottom of the lens there is a mini lens in the range of +1.5, +2 or +2.5 diopters for easier reading of the map, watch, navigation and other devices.

## CLEAR TO GREY WITH BLUEBLOCK

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening against insects, but during the day it darkens to gray, which renders individual colors relatively undistorted.

## ORANGE TO GREY

Shockproof orange lens, tinting automatically according to the degree of light in the environment to brown. In the deactivated state, they increase the clarity of vision, while in the darkened state, they pleasantly regulate the sharp sunlight. HD technology of special coloring of lenses with a special admixture then ensures the sharpest possible vision in environments for which the lens is purposefully developed, ie on trails and into nature.

# HD

High-contrast lenses  
increasing the rendering of the lenses

FOG AND NON-CONTRAST LIGHT

HD TECHNOLOGY

SHARP SUNLIGHT

HD TECHNOLOGY

DEEP SHADOWS

HD TECHNOLOGY

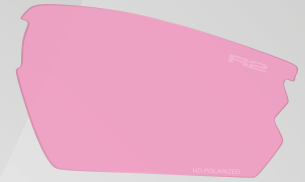

EDGE  
AT101B

HD lens technology increases the vision of specifically selected colors from the natural color spectrum. Thanks to HD lenses, we are able to see key details in a more contrasting environment, which in turn helps the brain respond faster and more accurately. HD technology achieves this by deliberately suppressing colors in the natural color spectrum so that the most important elements in the environment around us stand out clearly and distinctly and are as clear as possible.

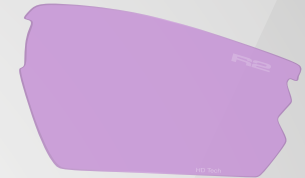

## PINK

Impact-resistant lens with a pink tint. These lenses increase the contrast of vision on a green and blue background, ie in nature, against the sky or on water. HD Tec or high definition technology means extra high definition. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

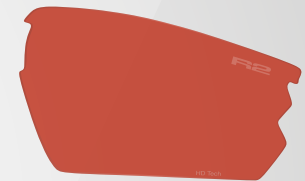

## PURPLE

Impact-resistant lens with purple tint. These lenses increase the contrast of vision on a gray background, especially on the road, in the city. HD Tec or high definition technology provides extra high resolution. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

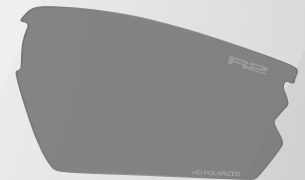

## BROWN-ORANGE

Impact-resistant lenses with a brown-orange color. They increase the clarity of vision. Comfortable and popular with situations and environments with poor visibility. HD Tec or high definition technology provides extra high resolution. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

## SMOKE POLARIZED

Impact-resistant lens with gray smoke color and polarizing filter. These lens colors render the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments. The polarizing layer on the lens reduces the penetration of light reflected from horizontal glossy surfaces. This increases the sharpness and comfort of vision while reducing eye fatigue. HD or high definition is a technology of special coloring of lenses with a special admixture ensuring the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

### SUN FILTER CATEGORY

0

**Category 0:** clear or very light filter  
(visible light transmission 80-100%)

1

**Category 1:** light filter (visible light transmission 43-80%)

2

**Category 2:** medium dark filter  
(visible light transmission 18-43%)

3

**Category 3:** very dark filter  
(visible light transmission 8-18%)

4

**Category 4:** very dark filter (visible light transmission 3-18%).  
Category 4 is not suitable for driving motor vehicles.

Sun filter category

# Onecolor

## SMOKE

Impact-resistant lens with grey smoky tint. These lens colors render the individual colors of the light spectrum relatively undistorted and are thus suitable for all types of environments, but do not excel in any of them.

## BROWN

Impact-resistant lens with brown tint. They limit the transmission of the blue component of the light spectrum, thereby distorting the whole impression into a warmer rendering. They increase the transparency of vision by reducing blue light.

## ORANGE

Impact-resistant lenses with an orange color. They increase the clarity of vision. Comfortable and popular for situations and environments with poor visibility.

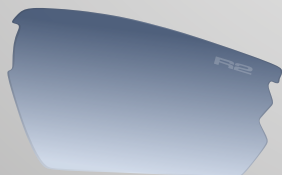

## YELLOW

Impact-resistant lens with yellow color. They fundamentally reduce the blue color of the light spectrum and brighten it the most. It is most often offered as an additional replacement lens.

## CLEAR

Impact-resistant lens with a clear color. Suitable for reduced visibility as eye protection, for example in the early evening and evening against insects or dirt. It is most often offered as an additional replacement lens.

## GRADIENT SMOKE POLARIZED

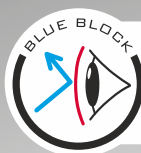

Impact-resistant polarizing lens with shaded gray-smoke tint. The universal and most popular color, sometimes also called „smoky“. These lens colors render the individual colors of the light spectrum relatively undistorted. The polarizing layer on the lens reduces the penetration of light reflected from horizontal glossy surfaces. This increases the sharpness and comfort of vision while reducing eye fatigue.

# BENEFITS

## TR90

Extremely lightweight and very durable high-tech material with superior flexibility and shape memory, increased wearing comfort.

## Blue block

Lens filter, eliminating harmful blue light. Reduces fatigue, headaches, has beneficial effects on sleep.

## Ventilation system

Enables air flow through lenses which protect sunglasses from fogging.

## Photochromatic

Lenses automatically darken / lighten according to the intensity of sunlight.

## Platinum lenses

Reduce eye fatigue thanks to special abrasion resistant mirror layer which significantly limits light transmittance eyes by simply reflecting most of it.

## Flexipad

Adjustable for shape. Provides more comfort by wearing, the nose pad can be adjusted to the shape of the nose.

## HD

High-contrast lenses to enhance image rendering.

## ImpactProtection

Almost unbreakable lens material provides eye safety.

## NoFrame

Allow unlimited view in all directions even when bending down.

## HD Pol

Polarized high-contrast lenses to enhance image rendering.

## Pro Optic compatible

Optional - removable diopter clip. Sunglasses can be used without clip.

## AntiSlip

Antislip tips and nose pads. Prevent slip sunglasses which perfectly on your face.

## Photochromatic HD

Combination of two top lens technologies - photochromatic and high resolution HD.

## Bifocal

Small diopter field at the bottom of the lens for better reading.

## Designed in CZ

All R2 products are developed and designed in the Czech Republic.

## Polarized

Lenses eliminate annoying reflections, suitable for sport, driving, water activities. Polarization helps eyes to reduce their fatigue.

## Lens edging

The possibility of edging of diopter lenses directly into the frame.

## New product

Seasonal news.

*PRO OPTIC  
PROGRAM*

# UNIQUE POSSIBILITY OF OPTIC PROGRAM *CROWN AT078*

## **LENS EDGING**

If sunglasses frame suits you so well, that you would like to use it as a prescription glasses, we offer the possibility of edging of diopter lenses directly into the frame

## **OPTICAL HALF RIM ATPRX2**

Optical half rim ATPRX2 suitable to R2 Crown model, which is fitted directly into the frame. It is characterized by undistorted view and low weight. It can be exchanged for sun lenses if needed.

## ***OPTICAL INSERTS ATPRX***

Versatile Pro Optic inserts ATPRX, which retain all the sunglasses advantages by hanging off the original lens. In addition, the insert can be easily changed between several sports sunglasses. The solution is simple and economically most favorable.

## ***BIFOCAL LENSES***

A smart bifocal solution for those who already need to focus better while reading, we have newly applied to clear photochromic glasses. The small dioptric field at the bottom of the lens does not prevent good view on a distance, but will help a lot when needed

to focus closer.

ATPRX	Plastic optical reduction, which is applied from the inside of the frame. To be used with usual sun lens.	
ATPRX2	Plastic optical half rim, to be inserted rightaway instead of sun lens. (ATPRX2A- clear, ATPRX2B- black, ATPRX2C- white)	
ATPRX3	Plastic optical reduction, which is applied from the inside of the frame. To be used with usual sun lens.	
ATPRX4	Plastic optical enlarged reduction, which is applied from the inside of the frame. Ensures higher periferic vision.	
ATPRX5	Plastic optical enlarged reduction, which is applied from the inside of the frame. Thanks to bigger size, ensures higher comfort.	
ATPRX6	Metal optical reduction, durable and more precise for the edging with aesthetic design.	
ATPRX7	Metal optical half rim, ewhich is applied from the inside of the frame. Allows edging of hogher diopter range, thanks to its curvature in base 4.	
ATPRX103	Plastic optical half rim, which is a part of the model VIST AT103. The advantage of this clip is lower curvature, which ensures edging of higher diopter range.	
ATPRX110	Plastic optical half rim, which is a part of the model VISION AT110. The advantage of this clip is lower curvature, which ensures edging of higher diopter range.

# DIABLO

125 0 140 base 8

DIABLO are unmistakable glasses expressing freedom of design and mind. Thanks to the removable bumper attachments, you yourself become the creator of their appearance and to some extent you can change the functionality of the glasses according to your current preferences. For example, you can easily create frameless glasses with a perfect, wide view and protection as partners for conquering long kilometers on a road bike. DIABLO looks robust, but thanks to the TR90 material used they are light. The non-slip material of the beams and sides keeps the glasses in place even in rough terrain.

# GAIN

Gain AT108 Uncompromising sports glasses that will awaken the competitor in you from the front of the peloton. R2 GAIN, typical for its sharp features, has been equipped with similarly shaped, high-contrast HD lenses, with which the asphalt surface and off-road traps are perfectly read. In addition, everyone can enjoy the benefits of the R2 GAIN, because we made them from high-strength and flexible TR90 grilamid and used Flexipad technology on the beams, thanks to which the beams can be adapted to the shape of each nose.

# VISION

57 17 130 base 6

*AT110 Vision. Are you looking for a matching, sporty cut optical frame for prescription lenses? R2 VISION, a frame made of our most popular material for sports glasses - grilamid TR90, serves these purposes. Not only is it extremely light. TR90 also has top strength and flexibility. We've designed the VISION frame to fit you in any sport, thanks to anti-slip sides and adjustable temples for every nose shape.*

# FACTOR

135 0 139 base 6.5

Factor glasses from the R2 designer workshop uniquely combine sports functionality with a perfect fashion look. Factor will thus serve well during training or a race, but also during normal active life. You can choose from models with different technologies. HD technology with an attractive red-black REVO lens, or if you're looking for fully adaptable technology, look for the Photochromatic version of the Factor. The full adaptability is further enhanced by the adjustable beam, so the Factor has the potential to fit anyone well.
