Helmet with perfect illumination MOONLIGHT

ATH38

Light the way and yourself for maximum safety with the Moonlight helmet. DUAL LED lighting, white light at the front and red light at the back can work in four different modes that can be adapted to the current situation. Thanks to the X-PROTECT system, the helmet meets the highest safety standards while being perfectly comfortable. The helmet label can be positioned according to the riding style.

Cycling shoes TERRA

ATSH06

Discover a new standard in comfort and performance with Terra cycling shoes. Thanks to the innovative BOA wheel and wider cut, we focused on customers with wider feet who don't want compromises. With comfortable and precise mounting settings, the Terra will give you optimal stability and control on every shot. The non-slip rubber sole provides incredible traction and safety to keep you comfortable while walking. Get ready for an unsurpassed cycling experience with the Terra shoes - enter a new world of comfort and performance.

Cycling gloves TRACY

ATR58

TRACY full finger gloves for young cyclists! The shape of the innovative full-finger gloves is specially designed for young riders who want maximum performance and comfort. The key features are the anti-slip print on the palm, a comfortable cuff instead of Velcro and a non-padded palm made of SKINTEC material for a perfect grip.

Cycling gloves TANNER

ATR61

TANNER full-finger gloves are made of SKINTEC material, which is characterized by pleasant softness and elasticity. They are available in a simple monochrome design with a reflective print, thanks to which you will not be overlooked. Perfect grip thanks to the non-slip and thin palm.

Backpack BLUE JAY

ATBP08

Are you looking for a backpack that is comfortable, functional and stylish? Then look no further than Blue Jay! With the innovative foam ventilation system of the back, you will feel fresh and comfortable even during demanding events. The Blue Jay boasts a perfect organizer for tools and accessories, located in the bottom pocket along with the raincoat. Thanks to this, you will have everything at hand and organized. Side pockets on the waist belt give you quick access to small items like keys or phone. An internal pocket for a spare battery and other useful pockets ensure that you have everything you need in its place. With a volume of 14 liters, the Blue Jay is ideal for day trips, shorter hikes or commuting. Thanks to its durable construction, it will last you many years of adventure.

FUSION

AT026H

Perfect vision, maximum comfort and a stylish look? R2 Fusion with its clean lines is here! These innovative glasses are made of high-quality Grilamid TR90 material, which is durable, light and flexible. HD lenses ensure a sharp and clear image in all lighting conditions. The anti-slip sides ensure a perfect fit during sports activities.

REVEL

AT027A

R2 REVEL sports sunglasses ready for any challenge that a sports day can throw at you. REVEL combines top design with advanced features that every athlete will appreciate. A perfect solution also for those who need prescription lenses. Thanks to the flexible sides, you can adjust the glasses to your head for a perfect fit. Improve your performance and enjoy every moment outdoors with REVEL glasses - where technology meets style.

IMPULSE

AT028D

R2 IMPULSE: The perfect combination of style and comfort. Discover the perfect accessory that will accompany you both during sports and in everyday life. IMPULSE are designed to offer not only top performance, but also distinctive style and maximum comfort thanks to ergonomic design and lightweight construction. The elegant combination of lenses and frame is not only aesthetically perfect, but also functional. IMPULSE glasses are ideal both for intensive training and for everyday wear. Enjoy the versatility that won't let you down either during sport or at rest. # Give your eyes the best with IMPULSE glasses!

SPEEDSTER

AT043C

Discover SPEEDSTER - sports sunglasses with an adjustable beam and the option of an optical insert that adapt to your needs. Their modern design and durable Grilamid TR90 material will offer you lightness, flexibility and top style for every sporting challenge and leisure time. Be ready for speed and elegance in every situation!

INVADER

AT044D

Introducing the Invader children's sports glasses, which combine a modern design inspired by popular adult glasses with the durability your children need. These glasses are not only stylish, but also highly functional, ideal for the daily adventures of little heroes. With the Invader, your children will not only get protection and comfort, but also a modern look that they will love. Ideal for sports, games and everyday wear.

JERSEYS 2025

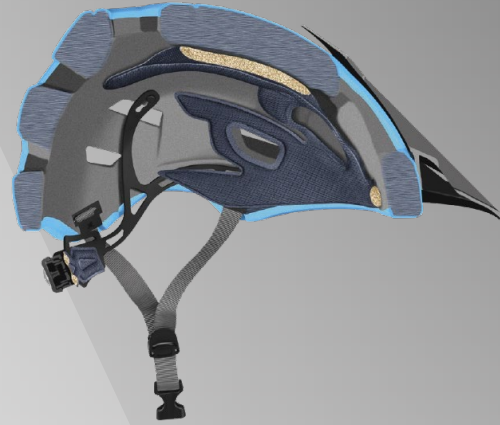

Helmets

X-PROTECT

R2 products are made exclusively by athletes who test and use their own products. Without compromising we insist on the highest safety standards in the segment of bicycle helmets. Selected models with the X-PROTECT label are increasing their protective ability due to larger and reinforced critical parts. Thanks MOLD IN the same time we are able to produce very lightweight helmets with an excellent ventilation capability, which together guarantees a high comfort of use.

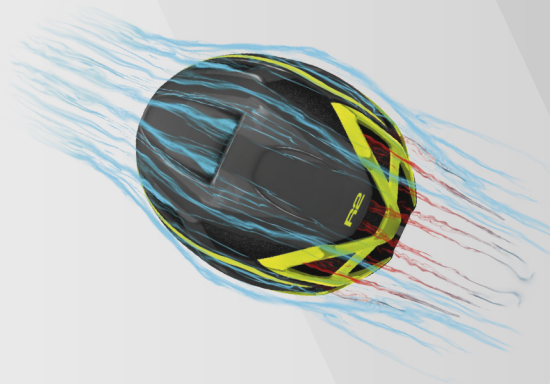

IN MOLD SHELL

Weight of the helmet is the key factor for comfort as well is as safety limit. Reduction of every gram of weight we take it as a challenge. IN MOLD technology is the most advanced method of production, thanks to which we are able to achieve the highest protective properties with the lowest possible weight. Durable helmet core made from hardened material / polystyrene is via heat and compression molding firmly connected with a poly-carbonate shell. R2 helmets thanks to technology IN-MOLD excel in low overall weight. The compactness of the helmet improves shock absorption due to the better distribution of impact forces. We guarantee you that you will feel comfortable and safe throughout your journey. So ride with a R2 helmet and have a fun.

AIR FLOW

Recent surveys among athletes show that satisfaction with a bicycle helmet is most influenced by a factor how it feels comfortable to wear. Maximum comfort significantly affects the ability of the helmet adequately ventilate heat generated by sport activity. Great attention is therefore devote the maximum amount of openings and above all perfectly directed air flow inside the helmet. We strive to make the R2 helmet feel not only safe but also very comfort throughout sports.

CE - Safety Pro

We guarantee proved helmets safety.

In-Mold Shell

Production technology, which makes the helmet of a single high-strength and lightweight unit.

X-protect

Increased security by increasing and intensifying the critical parts.

Ergo Fix

Fastening system that conforms to the shape and size of the head in two axes (vertical and horizontal). It can be manipulated with one hand using a pulling wheel.

Full Wrap In Mold

Perfect protection of the entire head circumference for maximum safety increase.

Dual Fix

Sophisticated system that is most adapted to the shape and size of the head. It can be manipulated with one hand using a pulling wheel.

Easy Lock

Allows you to fasten / unfasten helmet with one hand.

Bug Net

Prevents flying insects while riding.

Extra Padding

Spare removable and washable padding with bug net.

Led light

Removable safety LED light provides good visibility and increases passive protection for cyclists.

Dual Led light

Safety front white and rear red LED lights.

E-bike safe

The helmet is certified for use on an electric bike.

Designed in CZ

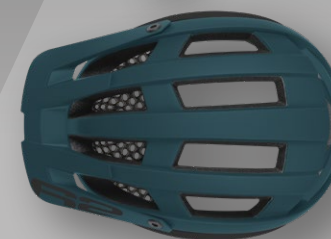

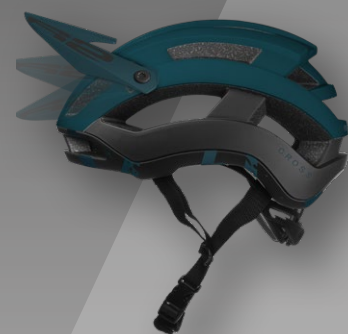

Designed in the Czech Republic.

CROSS

CE - SAFETY PRO / IN-MOLD SHELL / X-PROTECT
EASY LOCK / BUG NET / DESIGNED IN CZ

Riding perfect trails has never been more accessible. Whether you can enjoy them in safety, here is our trendy novelty - R2 CROSS, a trail helmet with increased protection of the nape of the neck, thoughtful ventilation and soft padding. We made it with full-wrap in-mold technology and, in addition to the adjustable peak, we also added a precisely adjustable clamping system in all four directions. In addition to trails, we also recommend the R2 CROSS helmet for cross country and every time you need to be safe.

We designed the R2 TRAIL 2.0 trail helmet according to the highest demands for safety and head protection during sharp, trail riding, where not only smooth paths, but often wet roots, stony passages and long jumps always lurk for you. The R2 TRAIL 2.0 helmet will allow you to focus purely on handling such traps, as it protects most of the head, thanks to a deeper In-mold shell with an extended neck, which is now even stronger thanks to X-Protect technology, while still being perfectly light and comfortable for all day wear. You can easily adjust the visor and clamping system and it has an MX spectacle holder in the back. So it doesn't matter how difficult the trail is, because with TRAIL 2.0 you get reliable protection for every situation.

EXTRA PADDING / DESIGNED IN CZ

Guard, this is a completely new model developed specifically for e-bike users. The safety of e-bikes is taken to a higher level, because the e-bike can more easily ride at a higher speed. Therefore, better safety tests were created for NTA-8776 certification helmets, which were obtained by the GUARD helmet. To achieve higher helmet strength, we used an inner composite skeleton pressed into the helmet core together with FULL-WRAP IN-MOLD technology, which strengthens the already durable helmet even more. Adjustable fastening system in all directions and soft inner lining made of pleasant antibacterial materials increases the comfort of use.

EXTRA PADDING / DESIGNED IN CZ

R2 SPIRIT is an aerodynamically tuned helmet with increased safety. When designing, we were inspired by racing cars, especially the characteristic shapes of spoilers and diffusers. These functional elements are the sloping shape of the helmet in the crown part and the large ventilation holes in the back. Result? Reduced airflow resistance and exceptional design. Beneath it lies an uncompromisingly hard full-wrap in-mold construction and even lower the inner padding of the helmet made of fine material, which you will appreciate, whether you are riding a short swing or a cross country race. Depending on your riding style, you can easily put on or take off a small cap flap and continue to focus on your race.

SPIRIT

EXPLORER

CE - SAFETY PRO / IN-MOLD SHELL
EASY LOCK / BUG NET / DESIGNED IN CZ

Combining technology and style. The timeless shape of the EXPLORER model is perfect not only for unexpected off-road fun but for fast driving on the road as well. On the track you will be protected by the increased durability of the helmet made up by the shells 100% protecting the soft core of the helmet from both the upper and bottom side. Phenomenal aerodynamics, on the other hand, encourages you to break some speed records. Elegant ribbing with massive air vents literally sucks air into the helmet and thus provides a perfect ventilation. The residual air current flows smoothly along the smooth surface of the helmet to the rear, where with the help of an optimally designed aerodynamic edge, turbulence is reduced and annoying noise is eliminated. Sophisticated ergonomics optimize the weight distribution and location of the helmet's center, so you will hardly feel the helmet at all. Now all you have to do is set out and RIDE YOUR RACE.

LUMEN

The LUMEN helmet is equipped with LED light on the back which significantly increases the visibility of the cyclist during ride and delivers a very desirable increase in passive protection for cyclists. Turn on and off the LED light is easy with one hand without removing the helmet. LUMEN is made with IN MOLD technology and an extended backplate for maximum head protection. Of course there is an internal net protecting from insect and an antibacterial pad.

SUNNY - CATEGORY 3

PHOTOCHROMATIC The revolutionary attribute of sports eyewear production. This advanced technology delivers to lenses a high versatility of use substantially in all light conditions. Lenses are able to react very quickly to the current intensity of UV rays and darken / lighten adequately to environment. With this feature glasses provide a high user comfort during all possible lighting conditions, thereby ensuring perfect vision.

FLUKE
AT100N

CLEAR TO GREY

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening and evening against insects or dirt, but during the day it darkens to gray, which renders the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments, for sunny weather as well as for reduced visibility.

GREY TO GREY

Impact-resistant gray lens, tinting automatically to a darker gray according to the degree of light in the surroundings. Renders the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments, in mild and sharp sun.

BROWN TO BROWN

Impact-resistant lens light brown, tinting automatically to a darker brown according to the degree of light in the surroundings. They limit the transmission of the blue component of the light spectrum, thereby distorting the whole impression into a warmer rendering. They increase the transparency of vision by reducing blue light.

CLEAR TO GREY WITH BIFOCAL

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening against insects, but during the day darkens to gray, which renders individual colors relatively undistorted. At the bottom of the lens there is a mini lens in the range of +1.5, +2 or +2.5 diopters for easier reading of the map, watch, navigation and other devices.

CLEAR TO GREY WITH BLUEBLOCK

Impact-resistant lens, clear, tinting gray automatically according to the degree of light in the environment. Suitable for reduced visibility as eye protection, for example in the early evening against insects, but during the day it darkens to gray, which renders individual colors relatively undistorted.

ORANGE TO BROWN HD ANTIFOG

Shockproof orange lens, tinting automatically according to the degree of light in the environment to brown. In the deactivated state, they increase the clarity of vision, while in the darkened state, they pleasantly regulate the sharpest possible vision in environments for which the lens is purposefully developed, ie on trails and into nature. The ingenious system of water-repellent ANTIFOG layers on the inside of the lenses ensures that the lenses do not fog even during extreme sports performances.

HD

High-contrast lenses
increasing the rendering of the image.

FOG AND NON-CONTRAST LIGHT

HD TECHNOLOGY

SHARP SUNLIGHT

HD TECHNOLOGY

DEEP SHADOWS

HD TECHNOLOGY

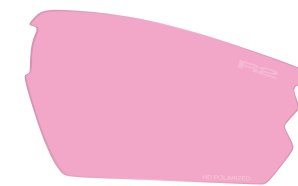

HD TECHNOLOGY increases the contrast of targeted colors from the natural color spectrum. Thanks to HD lenses, we are able to see key details in a more contrasting environment, which helps the brain to react faster and more accurately. HD technology achieves this by emphasizing or suppressing colors in the natural color spectrum so that the most important elements in the environment around us become clear as possible.

EDGE
AT101B

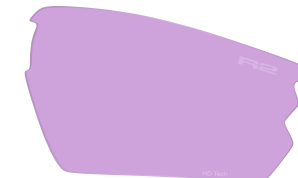

PINK

Impact-resistant lens with a pink tint. These lenses increase the contrast of vision on a green and blue background, ie in nature, against the sky or on water. HD Tec or high definition technology means extra high definition. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

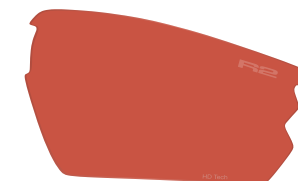

PURPLE

Impact-resistant lens with purple tint. These lenses increase the contrast of vision on a gray background, especially on the road, in the city. HD Tec or high definition technology provides extra high resolution. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

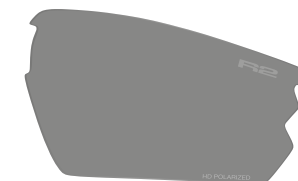

BROWN-ORANGE

Impact-resistant lenses with a brown-orange color. They increase the clarity of vision. Comfortable and popular with situations and environments with poor visibility. HD Tec or high definition technology provides extra high resolution. This special lens coloring technology with a special admixture ensures the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

SMOKE POLARIZED

Impact-resistant lens with gray smoke color and polarizing filter. These lens colors render the individual colors of the light spectrum relatively undistorted. They are thus suitable for all types of environments. The polarizing layer on the lens reduces the penetration of light reflected from horizontal glossy surfaces. This increases the sharpness and comfort of vision while reducing eye fatigue. HD or high definition is a technology of special coloring of lenses with a special admixture ensuring the sharpest and clearest possible vision in environments for which the lens is purposefully developed.

☁ / 0 **Category 0:** clear or very light filter (visible light transmission 80-100%)

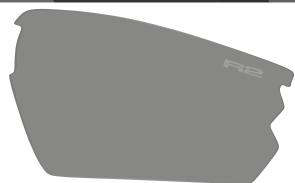

☁ / 1 **Category 1:** light filter (visible light transmission 43-80%)

☁ / 2 **Category 2:** medium dark filter (visible light transmission 18-43%)

☀ / 3 **Category 3:** very dark filter (visible light transmission 8-18%)

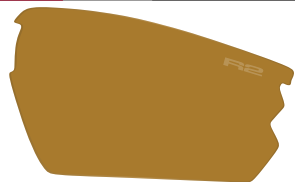

☀ / 4 **Category 4:** very dark filter (visible light transmission 3-18%). Category 4 is not suitable for driving motor vehicles.

☀ Sun filter category

SMOKE

Impact-resistant lens with grey smoky tint. These lens colors render the individual colors of the light spectrum relatively undistorted and are thus suitable for all types of environments, but do not excel in any of them.

BROWN

Impact-resistant lens with brown tint. They limit the transmission of the blue component of the light spectrum, thereby distorting the whole impression into a warmer rendering. They increase the transparency of vision by reducing blue light.

ORANGE

Impact-resistant lenses with an orange color. They increase the clarity of vision. Comfortable and popular for situations and environments with poor visibility.

YELLOW

Impact-resistant lens with yellow color. They fundamentally reduce the blue color of the light spectrum and brighten it the most. It is most often offered as an additional replacement lens.

CLEAR

Impact-resistant lens with a clear color. Suitable for reduced visibility as eye protection, for example in the early evening and evening against insects or dirt. It is most often offered as an additional replacement lens.

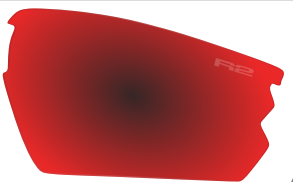

GRADIENT SMOKE POLARIZED

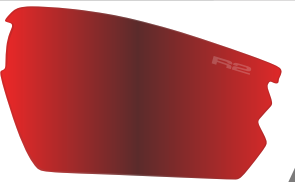

Impact-resistant polarizing lens with shaded gray-smoke tint. The universal and most popular color, sometimes also called „smoky“. These lens colors render the individual colors of the light spectrum relatively undistorted. The polarizing layer on the lens reduces the penetration of light reflected from horizontal glossy surfaces. This increases the sharpness and comfort of vision while reducing eye fatigue.

The various external mirror colors of the lenses play a role both in the aesthetic impression of the product and in the final color of the view through lenses. We in the R2 team are well aware of this and so we choose a combination of the basic color of the lens with a mirror finish so so that the result is maximum satisfaction from both the use and appearance of the glasses. Each mirror treatment of lenses used in the R2 collection it finally goes through Platinum technology, where the surface of the lens is hardened in order to minimize the sensitivity to mirror scratches.

SUPERDURABLE TR90

Extremely light and yet very durable high-tech material with above-average atvar elasticity memory, increased wearing comfort.

DURABLE

LIGHTWEIGHT

FLEXIBLE

TR90 material is highly resistant material due to its exceptional flexibility and shape memory. It has been specially developed for extreme conditions, where maximum strength and minimum weight is in demand. Testing of this material showed that the TR90 is able to prolong 5× the useful life of the product. Due to high flexibility of the material, glasses are very comfortable to wear themselves.

RACER
AT063W

TR90
Extremely lightweight and very durable high-tech material with superior flexibility and shape memory, increased wearing comfort.

Photochromatic
Lenses automatically darken / lighten according to the intensity of sunlight.

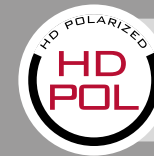

HD Tech
High-contrast lenses to enhance image rendering.

Polarized
Lenses eliminate annoying reflections, suitable for sport, driving, water activities. Polarization helps eyes to reduce their fatigue.

Photochromatic HD
Combination of two top lens technologies - photochromatic and high resolution HD.

HD Pol
Polarized high-contrast lenses to enhance image rendering.

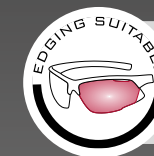

Chrome
Reduce eye strain thanks to special abrasion-resistant mirror.

Impact Protection
Almost unbreakable lens material provides greater eye safety.

Pro Optic
Optional - removable diopter clip. Sunglasses can be used without clip.

Edging Suitable
Option to grind the dioptic lens directly into the frame of sports glasses.

XchangeView
Sunglasses that can adapt to weather conditions and actual situation by replacing various lenses.

Temples Inclination
Adjustable sides affecting the inclination of the frame and the view through the glasses.

Adjustable Temples
Adjustable temples to improve fit goggles on the face.

Flexipad
Adjustable for almost any face shape. Provides more comfort by wearing, the nosepad can be adjusted to the shape of the nose.

Adjustable Tips
Adjustable tips to improve the fit of the goggles.

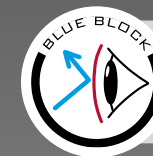

AntiSlip
Antislip tips and nose pads. Prevent slip sunglasses which holds perfectly on your face.

Ventilation System
Enables air flow through lenses which protects sunglasses from fogging.

Bifocal
Small dioptic field at the bottom of the lens for better reading.

Blue Block
Lens filter, eliminating harmful blue light. Reduces fatigue, headaches, has beneficial effects on sleep.

100% UV
100% protection against UV radiation A, B, C guarantee.

Soft Case
The soft microfiber cleaning pouch protect sunglasses against scratches.

CE - Safety Pro
Certification CE.

WINNER

Sports glasses with an extremely clean design, which predestines them to be worn both in sports and in leisure time. We have simply designed the R2 WINNER so that it will suit you in any situation, whether you are riding your race or discussing on the restaurant terrace. Their frame is made of TR90 grilamide, so they have exceptional strength and at the same time remain perfectly light. We also fitted this model with anti-slip beams and sides, platinum lenses to reduce eye strain and a ventilation system to prevent fogging.

GAIN

Uncompromising sports glasses that will wake up the head peloton racer in you. R2 GAIN, typical for its sharp features, we fitted with similarly shaped, high-contrast HD lenses, with which the surface of asphalt and terrain baits reads well. In addition, the benefits of R2 GAIN can be enjoyed by really everyone, because we made them from the high-strength and flexible TR90 grilamide and used Flexipad technology on the beams, thanks to which the beams can be adapted to the shape of each nose.

ATPRX		Optical clip, super light and durable made of TR90 grilamid, which is inserted into the glasses from the inside for use with a regular sun lens.										
ATPRX2		Optical reduction made of TR90 material directly into the frame of sunglasses instead of sunglasses. (ATPRX2A - clear, ATPRX2B - black, ATPRX2C - white)										
ATPRX3		Optical frame made of light and flexible TR90 grilamid, which is inserted into the glasses from the inside for use with a regular sun lens.										
ATPRX4		TR90 grilamid optical magnified clip that is inserted into the glasses from the inside for use with a regular sun lens. The advantage of this clip is that it allows a wider viewing angle.										
ATPRX5		Optical magnification clip made of TR90 grilamid that is inserted into the glasses from the inside for use with a regular sun lens. Thanks to the larger size, it provides greater wearing comfort.										
ATPRX6		Light metal optical clip, more durable and more precise for grinding with an great appearance.										
ATPRX7		Light metal optical reduction, which is placed directly in the frame instead of the sun lens. It enables the grinding of larger diopters due to the smaller curvature in the base 4.										
ATPRX8		Metal optical clip, more durable and precise for grinding with a good looking appearance.										
ATPRX103		Grilamid optical reduction, which is part of AT103 glasses. The advantage of this lens is less curvature of the lens due to the protruding shape.										
ATPRX110		TR90 grilamid optical reduction, which is part of the AT110 glasses. The advantage of this lens is less curvature of the lens due to the protruding shape.										

OPTICAL SOLUTIONS

Lens edging

If the glasses frame suits you so much that you want to use it as prescription glasses, we offer the option of edging the glasses lenses directly into selected frames.

Optical inserts

ATPRX

ATPRX universal plastic optical clips that retain all the advantages are mirrored by the fact that the clip is intended to be original lens. In addition, the clip can be easily changed between several types sports glasses. The solution is simple and economical most favorable.

Variable optical half rim

ATPRX7

ATPRX7 optical half rim for bestseller R2 Racer AT063 glasses, which is inserted directly into the glasses frame. Thanks to the smaller one curvature, a wider dispersion of diopters is possible, while the lightness and durability guarantee that you will not be limited in your sports activities.

Super thin optical insert

ATPRX6

Metal optical clip for sports glasses ensures high durability and resistance to impacts. Thanks to flexibility and adaptability metal, the clip easily adapts to the glasses frame, provides a more aesthetic appearance and allows more precise grinding of dioptric lenses for maximum vision and comfort during sports activities.

Optical half rim

APRX2

ATPRX2 optical half rim for the R2 Crown model series, which is embedded directly into the glasses frame. It stands out for its undistorted image and low weight. You can then be freely changed for sun lenses.

Bifocal lenses

A smart bifocal solution for those who already need to focus better while reading, we newly applied to clear photochromic glasses. The small dioptric field in the lower part of the lens does not interfere in any way good distance vision, but it will help a lot when needed focus close up.

Backpacks

R2

Air Shield

Back system for quality ventilation, which increases wearing comfort.

EVA Pour

The parts of the backpack that are in contact with the body are softened with EVA foam for greater comfort.

Rain Cover

Raincoat for a backpack cleverly hidden in the lower part of the backpack.

DESIGNED IN CZ

As you climb the mountain panoramas, you will use shoes that combine the best of hiking boots and purebred racing MTB trackers. With this in mind, we have created the R2 ORION, comfortable sports shoes with optimal torsional rigidity and grip of the sole, resistant even in conditions where the trail breaks into a rough stony passage. The midsole made of EVA foam and the upper, extremely breathable material of seamless construction then ensures comfort when walking, trouble-free, long wear without bruises and still maximum response to pedaling. R2 ORION are also equipped with a DIAL quick-release system and Velcro for ideal tightening.

VEGA

We designed the R2 VEGA MTB shoes as racing shoes. As a result, it is a shoe that has rigidity for powerful pedaling, but at the same time provides comfort for a normal ride through the countryside. The sole itself deserves attention – it consists of nylon fibers in combination with rubber segments for excellent traction. The grooves between the rubber parts of the sole allow self-cleaning and you can also use the prepared holes in the tip of the sole to mount two spikes for driving through difficult terrain. The easy-care surface with perforation ensures an ideal climate in the shoe, which can be tightened to the foot in detail thanks to the innovative DIAL clamping system.

DESIGNED IN CZ

DESIGNED IN CZ

Sports MTB shoes must meet several challenges. Energy transfer to the pedal without losses, adequate rigidity improving wheel guidance and durability, which does not come at the expense of comfort when worn frequently. This is exactly how we designed R2 NAOS shoes for you. It is worth adding that they are equipped with a solid nylon sole, complemented by a rubber pattern for better grip when walking on a slippery surface and reliable Velcro buckles, allowing precise tightening on the foot.

which guarantees complete waterproofness. The raincoat is a narrow cut with an extended back and with a drawstring rubber at the waist to suit for cycling. The hood is in one piece with the jacket, but you can use the option to roll it up in the collar and fix it with a loop and Velcro tape, or you can put it directly under the helmet. The collar is made of combed material on the inside. It is designed primarily for cyclists, but it can also be used as a light, foldable backup raincoat for hiking or other sports. The weight of the raincoat is around 100 g depending on the size.

EASE

REFLECTIV / BREATHABLE / HIDDEN HOOD / DESIGNED IN CZ

BREATHABLE
WATERPROOF

The EASE jacket is made of a very light and densely woven, windproof and breathable material. It's so light that when you're wearing it, you hardly know about it. It has a long main zipper, which is covered with a protective layer at the end under the chin.

Adjustable ventilation on the front and back provides a feeling of comfort and can be corrected with zippers. You can very easily pack the jacket in your back pocket in a few seconds. The packed jacket also fits in the back pocket of the jersey, so you can have it with you every time you ride. When the weather is really bad, you can use the hood, which is hidden in the collar. Thanks to the rubber in the hem of the hood, it adheres perfectly to your head. The collar is made of combed material on the inside.

ELASTIC PRO

ELASTIC PRO accepts individuality and uniqueness of each of us. R2 gloves are made from elastic materials in order to offer perfectly fitting gloves. That's why we use either a mesh or the Lycra. Netting itself is very elastic and also very well removes sweating. Lycra is a useful benefit in gloves when it is necessary high insulation properties while maintaining a sufficient degree of "breathing" materials.

EASY OFF

Technology of take down rings is a simple, but very useful benefit. Downloading sweaty gloves, their subsequent turning upside down, it's certainly not a popular discipline for athletes. Take down rings on gloves R2 greatly facilitate the whole process and so increase user comfort product again. They are also purposefully made from silicone so as to increase the slip properties of the glove.

PADED PRO

The most important benefit of gloves is their user-friendliness. R2 gloves are personally tested permanently and in all weather conditions. All seams and padding are designed to provide a maximum comfort. The materials used are strictly ANTI SLIP to ensure safety and smooth grip. R2 gloves with padding PRO technology will make you feel confident and comfortable whenever you go for your sports experience.

Reflectiv

Reflective elements increase athletes visibility.

Elastic Pro

Made from a flexible material that conforms well to the hands shape.

Breathable

Gloves breathe better and carry off the mixture of wet and heat.

Touch Pro

Touch screen usable.

Easy Off

Significantly facilitates removing.

AntiSlip

Anti-slip elements improve the safety of the handlebar grip.

Padded Pro

Padding reduces pressure sore in stressed areas.

Pro Gel

Gel reduces pressure sore in stressed areas.

Double Gel

Double gel padding eliminates bruises in stressed parts.

Join Protection

Thin gel padding at the finger joints to absorb shock. For rougher handling, more protection for hands during more predatory style of cycling.

Pro Wipe

Fleece surface for wiping.

AX Suede

Branded palm material specially designed for gloves that prioritize dexterity, strenght, high abrasion resistance, breathability, flexibility, softness, grip and a comfortable hand feel.

Skintec

Premium palm material characterized by strength, flexibility, abrasion resistance, but at the same time softness and pliability.

Designed in CZ

Designed in the Czech Republic.

MOISTURE GUARD / ERGO PROFILE / AIRFLOW GUIDE
ENDURANCE PRO PAD / SENS TOE SEAM / DESIGNED IN CZ

Ultra light cycling sock with ventilated surfaces. Ideal for daily training.
Made of light and durable polyamide. Ventilated mesh allows air to
circulate smoothly. Reinforced toe and heel area improves comfort.

NEW PRODUCT
NEU

Socks are reinforced in the most probable to bruising
parts to protect them and gain maximum comfort.

On the instep area, however,
is situated very light mesh that
guarantees excellent air circulation
and reduces overheating
of the foot in the shoe.

There is an ideal ergonomym reached due
to sewed elastane in exactly defined
percentage, which makes the sock fit to the foot like a second skin.

For increased comfort when riding
a bike, there is a reinforced part in the
point of contact of the foot with the pedal.

The R2 socks are made from the
highest quality materials and thereby
ensure the most effective use of
the functionality of polyamide, polypropylene, elastane, and also
natural materials. After detailed
research specialist achieved the ideal
percentage in the composition and
GSM of various parts of the socks.
