R2 WHAT'S NEW?

HDtech

The HD technology in our lenses is designed to highlight the visual cues that are key to the skiing experience. Through precision engineering and high quality materials, HD Tech offers the highest contrast possible, allowing skiers to more easily distinguish terrain, contours and various details on the downhill. Imagine HD Tech as a key element in your equipment that opens up a new dimension of skiing - a bright, sharp and contrasty world of mountains. With our ski goggles powered by HD technology, prepare for an experience that goes beyond the ordinary and immerse yourself in a world of mountain adventures with the best visual quality. Goggles with HD Tech can also be found among the new SPECTRA and QUANTUM.

Photochromatic lenses

PHOTOCHROMATIC is the unique ability of the glasses to adapt to current lighting conditions. This advanced lens technology gives the goggles high versatility for use in the understate in all lighting conditions. The chemical properties of the lenses can react very quickly to the current UV intensity and darken/lighten the lens. They are thus suitable for all types of environments, in sunny weather as well as in reduced visibility.

TOP in textiles

Introducing the updated ATR03 glove model, which brings even more comfortable materials and improved fastenings for next season, all while maintaining high quality. In addition, we've expanded the colour range on the ATR59 and ATR60 models, now available in trendy shades of lichen green for men and powder pink for women. Modern style and maximum comfort guaranteed!

Unique lens exchange system

QUANTUM ski goggles are equipped with a unique side lock that protects against loss in a fall. The lock is easy to use, so you can quickly change the lenses for clear ones when the weather changes suddenly. Clear exchange lenses are included on select models in this series. Another advantage of the QUANTUM goggles is the special strap clamping system, which makes it easy and quick to detach.

Novelty in ski helmets

Discover revolutionary protection and style with R2OCTANE and COOLMAN ski helmets. These cutting-edge helmets combine modern design, cutting-edge technology and maximum comfort for superior performance on the slopes. The progressive HYBRID SHELL construction ensures the highest level of protection on every ride, while advanced aerodynamic features and the comprehensive AIRVAC FLOW SYSTEM ventilation system give you the highest level of comfort even during invasive riding. Add to this the FIDLOCK magnetic buckle for fast and secure fastening. This is the ideal choice for those who don't want to compromise between safety, comfort and performance.

Functional hats

The R2 Outdoor Activities cap is ideal for all outdoor activities. It offers high thermal insulation, warm and breathable material for maximum comfort. Thanks to its quick-drying properties and effective sweat wicking, you stay dry even during strenuous exercise. A great choice for active winter days!

PHOTOCHROMATIC is the unique ability of the glasses to adapt to current lighting conditions. This advanced lens technology gives the goggles high versatility for use in the understatement in all lighting conditions. The chemical properties of the lenses can react very quickly to the current UV intensity and darken/lighten the lens. They are thus suitable for all types of environments, in sunny weather as well as in reduced visibility.

R2 SKI HELMETS BENEFITS

HYBRID SHELL

The most robust construction method that uses an extremely durable ABS shell and lightweight IN-MOLD construction. The result is a unique design that provides the highest level of impact and puncture protection, while offering all-round durability at optimum weight.

AIRVAC FLOW SYSTEM

Active ventilation: Smoothly adjustable airflow system with optimally positioned air vents heavily absorbs air which cools the interior of the helmet. It regulates the final temperature and provides high comfort in every situation. With this combination R2 helmets are very well ventilated.

ANTIFOG

Technology at which is an invisible layer of nanoparticles applied to the inner lens and thereby preventing condensation of water vapor on the surface and so eliminating fogging. Using this technology maximizes the lifetime of goggles while

IMPACT PROTECTION

The material used to make the lenses is made of impact-resistant polycarbonate, specially developed for protection against gross damage. Thanks to this, the lenses are perfectly safe and at the same time lighter by up to 20% compared to conventional plastic lenses. The safety of R2 lenses is guaranteed by testing in an accredited laboratory.

HYBRID SHELL

The most robust construction method that uses an extremely durable ABS shell and lightweight IN-MOLD construction. The result is a unique design that provides the highest level of impact and puncture protection, while offering all-round durability at optimum weight.

MULTIVISION

The multi-curved surface of the lens is the most technologically advanced optical element composed of two spherical surfaces. The rounded surface is better adapted to the human eye, eliminates the distortion of the transmitted image and thereby achieving a clean undistorted vision of each skier. Advantage of panoramic MULTIVISION lens is maximum sharpness at all angles of view, a perfect peripheral vision and optical precision.

FLUFFY SENSE

Shaped antibacterial SOFT SENSE padding provides extra warmth and a pleasant feeling. Soft fleece with SENSITIVE treatment is very pleasant to touch and forms an insulating layer protecting skier's head from chilling.

CHROME

Shield covered with a special mirror layer. It significantly reduces the amount of light that enters your eyes by simply reflecting off a large part of it. Today, it is possible to have this mirror layer in all shades of the rainbow. In addition, the Platinum mirror layer is abrasion resistant.

OTG

The helmet is compatible with standard prescription glasses thanks to sufficient internal space.

FIDLOCK MAGNETIC coming from Germany is one of the most innovative brands in the sports industry, focusing on research and development of products based on combination of magnetic and mechanical lock. A patented solution that combines powerful magnets that automatically connect the buckle and a mechanical lock that allows disconnection only if you really want to do so. All products are designed to make life easier for their users.

100% UV

All R2 goggles have 100% protection against UV radiation A, B, C.

DESIGNED IN CZ

All products are developed and designed in the Czech Republic.

GUARANTEE

Certified quality EN 1077:2007 or EN 174:2001.

OCTANE

Discover revolutionary protection and style with the R2 OCTANE ski helmet. This highly innovative helmet is the perfect combination of technology and modern design. The progressive HYBRID SHELL construction combines the benefits of lightweight IN-MOLD construction with the exceptional durability of a solid ABS shell that provides maximum protection on every ride. The helmet's advanced aerodynamic properties ensure a comfortable and stable ride even at high speeds. The R2 OCTANE is the perfect choice for those who don't want to compromise between safety, comfort and performance on the slope. Be ready for any terrain with this premium helmet that won't let you down.

COLLMAN

Developed according to the latest trends, the R2 COOLMAN high-end ski helmet is packed with modern technologies to ensure maximum comfort and protection. Unique HYBRID SHELL construction offers the perfect balance between exceptional durability and light weight. The durable hardshell construction provides the highest level of protection that effectively absorbs impact energy, while in-mold technology with a polycarbonate shell keeps the helmet lightweight and comfortable. Thanks to the comprehensive AIRVAC FLOW SYSTEM ventilation system, you will enjoy optimal comfort even during intense riding. For even easier handling, the helmet is equipped with a magnetic FIDLOCK buckle, which guarantees fast and secure fastening. The R2 COOLMAN is the ideal choice for those looking for the perfect combination of safety, performance and modern design.

SKI GOGGLES

☁ PHOTOCHROMATIC ☀

HD lens technology increases the vision of specifically selected colors from the natural color spectrum. Thanks to HD lenses, we are able to see key details in a more contrasting environment, which in turn helps the brain respond faster and more accurately. HD technology achieves this by deliberately suppressing colors in the natural color spectrum so that the most important elements in the environment around us stand out clearly and distinctly and are as clear as possible.

PHOTOCHROMATIC is unique ability of the glasses to adapt current lighting conditions. This modern technology adds helmet high versatility use in really all weather conditions. The chemical properties of lenses can very quickly respond to the current intensity of UV radiation and darken / lighten the shield.

MAG-TOUCH
Very easy change from sun lens to clear with a simple point magnetic system. Thanks to magnets on between two lenses, you simply take one of them off.

R2 SKI GOGGLES BENEFITS

ULTRA SHARP EYE

The surface of the lenses, which is rounded many times and is formed by two spherical surfaces, is the most technologically advanced optical element. The rounded surface better suits the human eye, eliminates distortion of the transmitted image and allows perfectly clear, undistorted vision. Thanks to this, you can enjoy maximum sharpness at all angles of view, perfectly peripheral vision and the optical accuracy that these panoramic lenses bring.

ANTIFOG

Technology at which is an invisible layer of nanoparticles applied to the inner lens and thereby preventing condensation of water vapor on the surface and so eliminating fogging. Using this technology maximizes the lifetime of goggles while maintaining high clarity of the lens.

FLEX FOAM

Very soft and cozy. Multilayer core construction of POLAR foam is characterized by high stability. High resistance against impact is achieved by combining unique composition and different density of each layer. The outer layer made of microfleece is gentle to the skin, absorbs and takes away moisture from skier's face and provides a high level of comfort.

ANTISLIP

Protiskluzový silikonový potisk na vnitřní straně pásku brýlí brání posunu po helmě a udrží brýle pevně na svém místě přesně tak, jak si je nasadíte.

CHROME

Visor covered with a special mirror layer. It significantly reduces the amount of light that enters your eyes by simply reflecting off a large part of it. Today, it is possible to have this mirror layer in all shades of the rainbow. In addition, the Platinum mirror layer is abrasion resistant.

MAG-TOUCH

Very easy change from sun lens to clear with a simple point magnetic system. Thanks to magnets on between two lenses, you simply take one of them off.

MAG SWITCH

Innovative magnet system enables extremely fast replacement and perfect fit of the lens, in just few moment you can change the lens and thus react to changing conditions very fast.

SHARP EYE

The rounded surface of the lenses is formed by a cylindrical surface, which affects the impact of light rays in a perpendicular plane on the glasses. This makes image processing by the eye much easier. To prevent distortion of the transmitted image, SHARP EYE lenses are equipped with optical correction, which sharpens vision and increases the perception of surrounding objects.

IMPACT PROTECTION

The material used to make the lenses is made of impact-resistant polycarbonate, specially developed for protection against gross damage. Thanks to this, the lenses are perfectly safe and at the same time lighter by up to 20% compared to conventional plastic lenses. The safety of R2 lenses is guaranteed by testing in an accredited laboratory.

PRO OPTIC

Compatible with an optical insert that the optician inserts dioptric lenses. Purchase insert available.

OTG

Glasses compatible with standard prescription glasses thanks to sufficient internal space.

100% UV

All R2 goggles have 100% protection against UV radiation A, B, C.

GUARANTEE

Certified quality EN ISO 18527-1

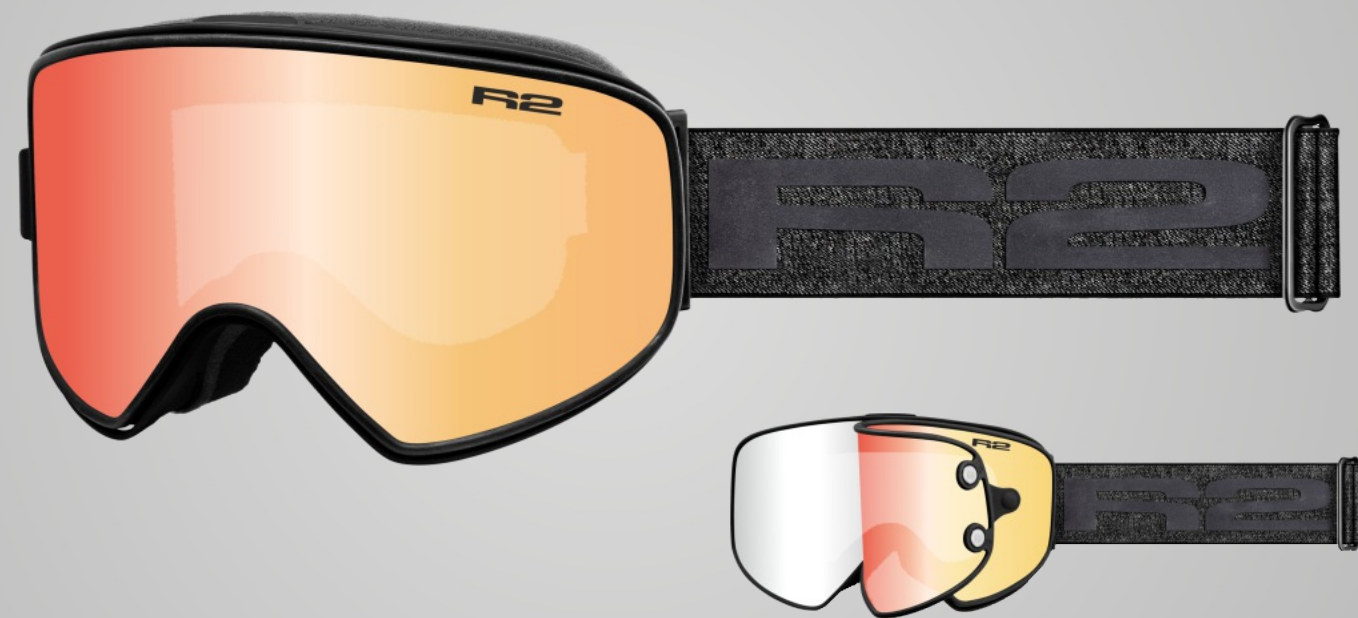

DESIGNED IN CZ

All products are developed and designed in the Czech Republic.

AVALANCHE

We have done our best to make changing the lenses on the ski goggles as comfortable and quick as possible. That's why R2 AVALANCHE glasses are provided with MAGNETIC X-CHANGE technology. The name hides an innovative magnetic lens mounting system, so it's very easy to take the glass out of the frame. In a few seconds, you will be able to react to the unstable weather that prevails on the mountain plains, and it doesn't matter if you run down the slope in fresh powder or crush the velvet. You will see all the terrain perfectly. In addition to magnets, we have equipped the lenses with SHARP EYE and ICE VISION technologies, which brings perfectly clean optics without the chance of icing and zero distortion of objects. And fogging when the terrain makes you sweat a lot? No worries. A large part of our new ski goggles combine active and passive elements of ventilation, so the air flowing through the frame does not give the dew a chance.

AT605 - Avalanche
Frame: black / matt
Lens: brown BRONZE / INFERNO CHROME / S3
Inner lens: clear CRYSTAL / S0

AT605A - Avalanche
Frame: black, matt
Lens: brown BRONZE, OCEAN CHROME, S3
Inner lens: clear CRYSTAL, S0

GLACIER

If any of our new R2 ski goggles are loaded with technology, it is definitely the GLACIER model. You can get an elegant, decently rounded and highly flexi frame with a unique combination of photochromic (coloring according to conditions) and polarization (removal of reflections) in one lens! Alternatively, you can choose the variant with HD (High Definition) lenses. All variants have a three-combination of benefits for skiing without compromise in all conditions - ULTRA SHARP EYE (maximum sharpness and perfect peripheral vision thanks to rounding), ICE VISION (optically clear anti-icing lenses) and IMPACT PROTECTION (highly safe lenses made of impact-resistant polycarbonate). No mountains have a chance to surprise you with their conditions from now on!

AT607 - Glacier

Lens: clear to grey / INFERNO CHROME / S1-S3

AT607B - Glacier
Frame: black / matt
Lens: pink ROSE / AMETHYST CHROME / S2

AT607C - Glacier
Frame: pink, powder / matt
Lens: clear to grey / ROSE GOLD CHROME / S1-S3

AT607G - Glacier
Frame: lavender / matt
Lens: orange to grey / AMETHYST CHROME / S1-S3

SPECTRA

The SPECTRA ski goggle model brings a continuation of the focus on hi-tec technology in the R2 collection. With innovative PHOTOCHROMIC self-tinting lenses and high contrast HD Tech lenses, SPECTRA offers the highest quality and unbeatable comfort. All goggles with HD Tech lenses are equipped with a replacement clear lens with the unique MAG SWITCH exchange system, which guarantees easy and quick handling when changing lenses.

QUANTUM

Go skiing with peace in mind and without worrying about your goggles. QUANTUM ski goggles are equipped with a unique lock on the sides to prevent loss in a fall. The lock is easy to use so you can quickly change the lenses. QUANTUM goggles are also equipped with HD lenses that provide sharper vision and protection from the sun and UV rays. QUANTUM goggles are the ideal choice for all skiers and snowboarders who want to keep their goggles safely protected while enjoying perfect vision.

R2 RX PROGRAM

Optional removable dioptic clip ATGPRX1. The glasses can be used without restriction even without a clip.

GLOVES

R2 GLOVES BENEFITS

ANTI SLIP
Anti-slip parts placed on the palm or fingers increase the overall gloves adhesion and improve the control.

THINSULATE
The unique 3M THINSULATE insulating microfibre is nearly twice as warm as an ordinary fiber and is one of the lightest synthetic insulating materials on the market. Thin fibers retain more air in a smaller space, making Thinsulate insulation a better insulator. It has a minimal water absorption and it also quickly dries out. It does not cause allergies.

SKINTEC
Premium palm material characterized by strength, flexibility, abrasion resistance, but at the same time softness and pliability

HEAT CONTROL
Kombinací funkčního materiálu na výrobu prodyšného oblečení a jemné podšívky šetrné k pokožce je docíleno vyváženého tepelného komfortu, který zajistí vysokou úroveň pohodlí v náročných klimatických podmínkách a chrání i před vychladnutím po skončení fyzické aktivity.

TOUCHPRO
Gloves for touch screen displays allow comfortable control of electronic devices.

DESIGNED IN CZ
All products are developed and designed in the Czech Republic.

3D-MOTION
Based on the expertise of physicians and testing by professionals we developed 3D-MOTION, an unique ergonomics solution for gloves. In cooperation with leading gloves manufacturer with a long tradition and experience we designed 3D pattern and construction respecting ergonomics of skier's hand. By anatomic shaping copying fingers radius we achieved a natural shape of the glove with high comfort of use. In practice this shaping eliminates some of the annoying problems that can be caused by long-term skiing

TECH SHELL
Modern functional softshelled material composed of several layers suitable for production of breathable and very comfortable upper layers, which protect against water and wind.

PRIMALOFT
Branded insulation material with maximum thermal efficiency with respect for the environment made from 100% recycled material, waterproof, super soft.

WINDBREAKER
By combining functional material used for the manufacture of breathable clothing and soft lining gentle to the skin we were able to achieve balanced thermal comfort which ensures high level of comfort in demanding climatic conditions and protects against getting cold after physical activity.

REFLECTIV
Reflective elements increase visibility in bad light conditions.

WINTER GLOVES		
HAND CIRCUMFERENCE (cm)	SIZE

BLIZZARD

Sufficiently insulated BLIZZARD gloves designed for cold conditions are suitable for both cross-country skiing as well as cycling. Modern functional WINDBREAKER material guarantees perfect wind resistance and breathability due to its natural features. Anatomic 3D MOTION shaping respecting hand ergonomics enhances comfort, does not restrict movement even with a firm grip and makes control much easier.

WRAP

The upgraded R2 model of 2-in-1 gloves, the breathable finger gloves turn into wind and waterproof thumb gloves in an instant, protecting all fingers including the thumb. Reflective print increases visibility in low light conditions. Pointer with Touchpro print for easy control of displays. With the fleece area on the thumb, you can easily wipe your forehead, mouth or nose during activity.

BOND

Lightly insulated sports gloves suitable for a wide range of sports in cold to freezing conditions. Ergonomically shaped for a comfortable grip on poles or handlebars. Equipped with upper material with water and wind resistant treatment. Reflective print increases visibility in low light conditions. Pointer with Touchpro print for easy control of displays. With the fleece surface on the thumb, you can easily wipe your forehead, mouth or nose during activity.

ARCTO

Winter gloves with padded palm are the ideal companion for cycling and other cold weather sports. With premium AXX palm leather, they provide maximum wearing comfort. The wind and waterproof comfortable back material keeps your hands dry and extra warm thanks to the fleece interior. Touch Pro on the index finger and thumb allows for easy device control. The soft silicone print provides a great grip. Reflective print adds style and safety to the gloves. Get ready for uncompromising performance in the winter season.

NEXA

Finely insulated gloves with a combination of gel and memory foam in the palm padding create ultimate comfort and shock absorption. Touchpro on three fingers allows comfortable control of the device. The silicone print palm padding ensures an exceptional grip, while the breathable back material and water and wind resistance guarantee optimal conditions for sports performance. The neoprene cuff provides a perfect fit and the reflective print on the back of the palm increases visibility.

HATS

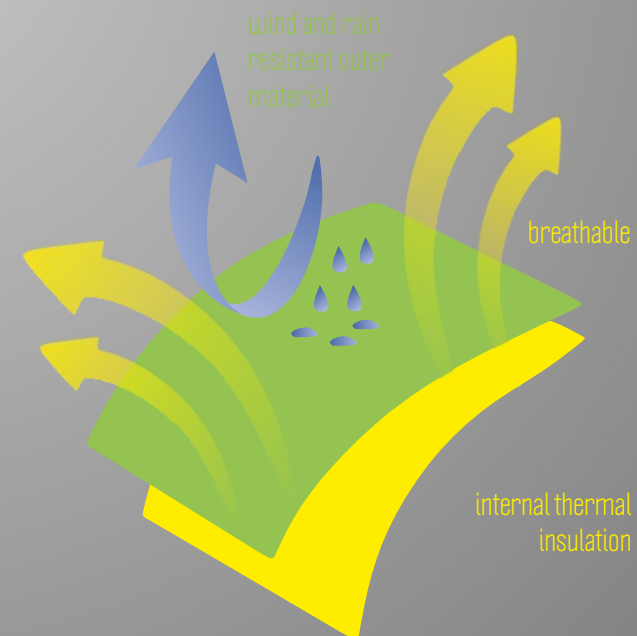

Functional R2 hat may be used for any winter activity outdoors. Breathable, elastic material with high thermal insulation guarantees perfect sweat drainage, releases moisture and does not bind it to itself. Fine brushed reverse side of the hat ensures a high comfort. The material does not shrink, it is odor-resistant. The hat protects you from the sun, wind and snow.

- for all outdoor activities
- high thermal insulation
- maximum comfort
- warm brushed material on the reverse
- breathable
- odor - resistant
- ideally transports the moisture
- fast drying
