THE STORY BEHIND THE LIMITED EDITION:

AMÁLKA ŠVÁBÍKOVÁ × R2

Amélie Trahan

HOLDER OF THE NATIONAL
RECORD OF 480 CM

5TH WOMAN OF THE OLYMPIC GAMES

AT100 FLUKE

THE BEST JUST GOT BETTER

The iconic FLUKE model receives a technological upgrade like no other. For the most demanding users, we present the AT100A6 version featuring HD Photochromatic technology – adaptive lenses that respond instantly to changes in light and enhance every detail and terrain contour. The AT100A5 version is equipped with cutting-edge HD PolarXTR – next-generation polarized optics in a durable polycarbonate lens that reduces glare, boosts contrast and color saturation, and delivers maximum clarity even in changing light conditions. FLUKE is back – more powerful than ever.

AT114 BOOST

STYLE THAT PERFORMS

Sporty elegance in a clean silhouette. The new BOOST model combines lightweight construction, a ventilated half-frame, and a cool design you'll love – even off the field. The AT114F version features HD PolarXTR technology – perfect for anyone who wants to see more, whether cycling, playing beach volleyball, or out on the water. Maximum contrast, glare elimination, relaxed eyes, and quicker reactions. With R2 BOOST, the ride just flows.

AT113 CLIFF

READY TO WIN

CLIFF is a no-compromise model. A sporty look, a durable yet ultra-light TR90 frame, adjustable nosepiece and temples – all designed for maximum performance. HD Tech and photochromatic technology ensure perfect visibility in any environment. Enhanced contrast and instant light adaptation let you focus solely on victory.

AT118

NO COMPROMISES AT HIGH ALTITUDE

A long-awaited newcomer – eyewear built for true mountain challenges. Removable side shields protect your eyes from all angles, and the photochromatic AT118E version reaches the highest sun protection level – Filter Category S4 – ideal for high-altitude conditions. With the AT118, you'll enjoy every climb and panoramic view – without the glare.

AT115 LIT**JUNIORS AT FULL POWER**

A sporty model for young talents who mean business. The lightweight half-frame offers an unobstructed view, secure fit with rubberized temple tips, and a style that resonates with today's generation. The light and flexible TR90 material is ready for anything – from cycling to tennis. R2 LIT – when junior means performance.

**AT116 HYPE****LITTLE ATHLETES, BIG POTENTIAL**

The AT116 model is designed for kids aged 5 to 10 who love to stay active. Its ergonomic shape and adjustable nosepiece ensure a perfect fit. The frame also accommodates an optical insert, so prescription lenses are no obstacle. Made from TR90, it offers both durability and lightweight comfort. HYPE opens up a world of sports – with no limits.

NANOSHIELD**INVISIBLE POWER FOR A CRYSTAL-CLEAR VIEW**

Protect your optics with the very best. NANOSHIELD technology represents a state-of-the-art lens coating that ensures long-lasting clarity, protection, and visual sharpness. An invisible nanolayer minimizes the buildup of dust, fingerprints, and oils, while water rolls off effortlessly without streaks – thanks to the lotus leaf effect. The ultra-smooth surface reduces friction when cleaning and helps prevent lens damage, so you can enjoy a flawless view without compromise – even after extended use.

NANOSHIELD technology is available on models: AT027G, AT027I, AT100A5, AT100A6, AT108A3, AT118C, AT118E, and the entire AT114 series.

**SALTSHIELD****DURABILITY THAT STANDS UP TO THE SEA**

SALTSHIELD is an advanced lens protection technology designed specifically for the harsh conditions of salty environments. This innovative coating prevents salt buildup, slows corrosion, and protects lenses from damage caused by seawater, wind, or sweat.

You'll find this technology across the entire AT028 and AT086 model range.

FOR MEN MTB

Get ready to ride with our latest collection of cycling gear, designed for maximum performance and comfort. Whether you're conquering tough trails or tackling long alpine climbs, the **Terraform helmet** offers extended coverage and optimal ventilation for top-level protection. For efficient power transfer and confidence on rugged terrain, the **Fortex shoes** feature the DIAL FAST closure system and GripZone outsole – built for enduro, trail, and technical all-mountain riding. Don't forget the **Tanner 2.0 gloves**, with premium Skintec palms for comfort, softness, and breathability – available in classic black or a bold graphic design. Carry your essentials with the **Blue Jay backpack** (14L), offering a smartly organized storage system and an innovative foam ventilation panel for your back. For the upcoming season, it's available in khaki green – perfectly matching the rest of your mountain bike gear!

FOR WOMEN MTB

Hit the trails with our new cycling gear collection, specially coordinated for female riders! The **Vorteks helmet** delivers top-level protection and comfort for demanding terrain. Its lightweight shell with a reinforced core and extended rear coverage reliably absorbs impacts. Thanks to the 360 Wrap Fix retention system, the helmet fits perfectly in all conditions, while efficient ventilation ensures comfort during long climbs and technical descents. For maximum performance and stability on rough ground, choose the **Fortex MTB shoes** – offering the perfect balance between stiffness for efficient power transfer and all-day comfort. The DIAL FAST system and GripZone outsole give you confidence on any surface. Complete your look with the **Ombra 2.0 short-finger gloves**, a truly women-specific model featuring Double Gel padding and premium Skintec material. Now available in fresh, trendy, and bold color designs that match your gear and make a statement. Don't forget the **Raven backpack** (10 L), perfect for all-day rides. With a helmet holder and smartly placed pockets, you'll have everything you need at hand. For the upcoming season, it comes in a new lilac purple shade – made exclusively with female cyclists in mind.

GRAVEL

Set off on a gravel adventure with our new collection that combines top performance and all-day comfort! The **Vantage helmet** is an ultra-light, versatile racing helmet designed for those who demand maximum performance without compromise. Its aerodynamically optimized shape and 20 strategically placed ventilation openings ensure excellent cooling with minimal air resistance. Rubberized vents securely hold your sunglasses, and the updated 360 Wrap Fix adjustment system allows for quick and precise fitting. Complete your style and comfort with **Vittoria short-finger gloves**. This model features Double Gel padding to boost handlebar grip comfort, while the premium Skintec palm material offers an incredibly soft and pleasant feel. Available in new, trendy yet subtle solid-color options that perfectly match your gravel riding outfit.

ROAD CYCLING

Discover our new collection designed for road cycling – built to help you reach new levels of performance and style! With the **Verge helmet**, you'll experience maximum aerodynamics and minimal air resistance thanks to its frameless, streamlined design. Precisely engineered vents and an advanced ventilation system deliver efficient cooling even under intense effort, while the lightweight construction ensures lasting comfort on long rides. Verge blends cutting-edge technology and safety with a minimalist look that enhances both your speed and style. Complete your outfit with the new **Topas road gloves**, made with premium AirFlex Grip palm material and anti-slip treatment. These gloves are extremely comfortable, flexible, and breathable. Our collection includes both traditional, toned-down colorways and boldly expressive, vibrant designs. Ready to take your road performance to the next level?

KIDS

Get ready for endless cycling adventures with our new collection designed especially for young riders!

With the **Vorteks JR helmet**, your child will stay safe and comfortable. This helmet combines a modern design with advanced protection for riding in challenging terrain. The lightweight shell with a reinforced core reliably absorbs impacts, and extended rear coverage protects where it matters most. The 360 Wrap Fix fit system ensures a perfect, secure fit, while effective ventilation keeps things cool even on long rides.

Complete your young cyclist's gear with the new **Mistral kids' gloves**. Made with premium Skintec palm material, these gloves come in vibrant color designs that kids will love – eye-catching, fun, and easy to match with their other cycling gear.

Enjoy every ride with your kids – to the fullest, and in total safety!

HD PHOTOCROMATIC

A NEW DIMENSION OF LIGHT ADAPTATION

The revolutionary HD Photochromatic optical technology represents the pinnacle of innovation in adaptive vision. The advanced Adaptive LightSync system detects UV radiation and automatically adjusts lens tint in real time, ensuring perfect visibility without loss of sharpness.

HD Photochromatic eyewear is far more than ordinary “darkening” lenses. It’s intelligent adaptive optics that:

- Reacts almost instantly to changing light conditions.
- Eliminates glare and protects your eyes.
- Enhances details and terrain contours with HD Contrast Boost technology.
- Provides visual comfort without eye fatigue.

WHEN TO USE HD PHOTOCROMATIC

- **Cycling in the forest or on the road** – the glasses respond for you – smooth and safe vision.
- **Mountain hikes with sun, snow, and fog** – one pair of glasses for all conditions.
- **Running or hiking** – always the ideal light transmission.

WHY CHOOSE HD PHOTOCROMATIC IN R2 EYEWEAR

- Cutting-edge adaptive vision technology.
- Uncompromised clarity.
- Glasses that adapt to your environment.
- Perfect for both sports and everyday wear.

PHOTOCHROMATIC

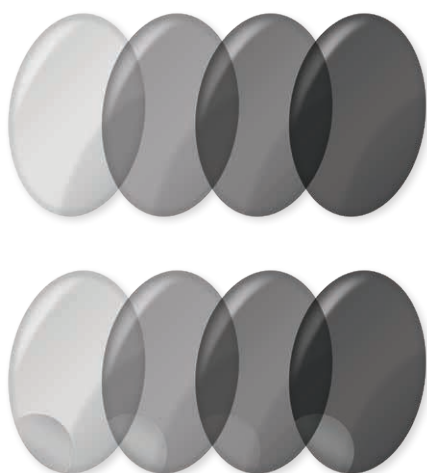

PRECISE LIGHT ADAPTATION FOR MAXIMUM PERFORMANCE

Advanced lens brightness adaptation technology ensures real-time precision adjustment to surrounding light conditions. Thanks to its highly sensitive response, the photochromatic layer actively reacts to UV intensity, optimizing light transmission and tint for maximum visibility.

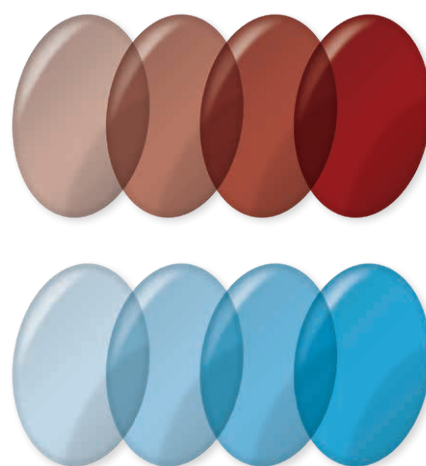

Always the Right Brightness Level

Whether you're in the city, nature, mountains, or under clouds, this auto-adaptive system delivers ideal brightness and contrast without any loss of visual quality. The ultra-fast light exposure adjustment guarantees instant adaptation to every situation for perfect visual comfort.

NO CHROME

WITH CHROME

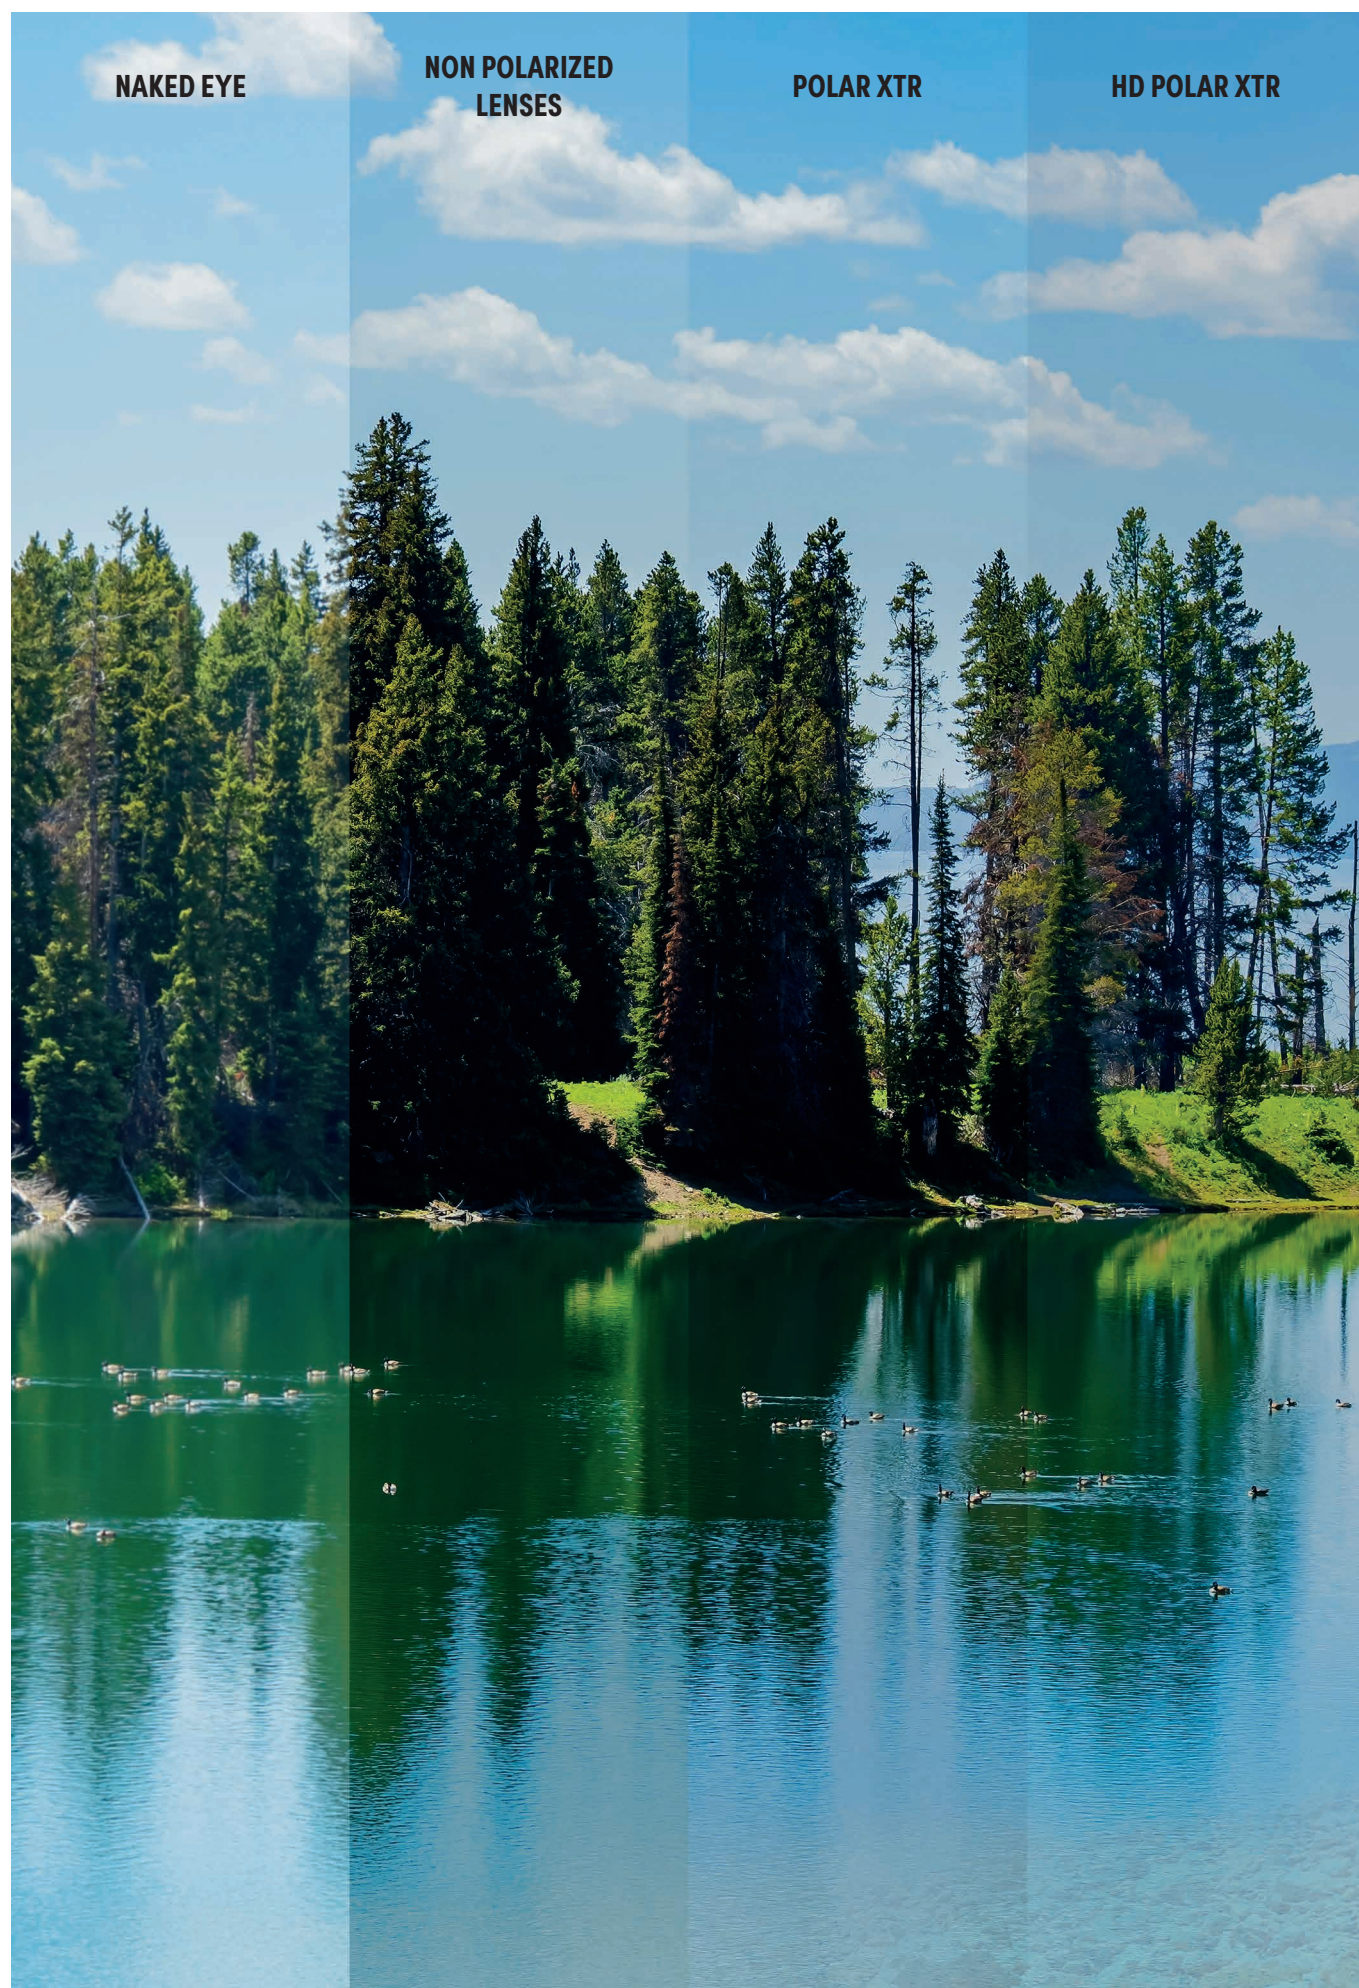

WHEN TO USE R2 PHOTOCROMATIC

- **Cycling off-road or on the road** – Photochromatic lenses ensure clear terrain visibility and glare protection, whether in sunlight or shadow.
- **Trail running in the mountains** – Transition seamlessly between bright alpine light and shaded forest paths without losing terrain awareness.
- **Outdoor climbing** – Safer vision on ever-changing rock faces, with lighting conditions shifting by orientation and elevation.
- **Golf or shooting sports** – Subtle light adjustments help maximize focus and aiming precision in any weather.
- **Travel and hiking** – Smooth transitions from open sunny plains into shaded valleys – no need to change your glasses.

WHY CHOOSE PHOTOCROMATIC IN R2 EYEWEAR

- Real-time automatic light adaptation.
- No blinding glare or loss of contrast.
- Ideal for environments with constantly changing light.
- UV protection and clear vision without thinking twice.
- Technology designed for those who want confidence in every step and every view.

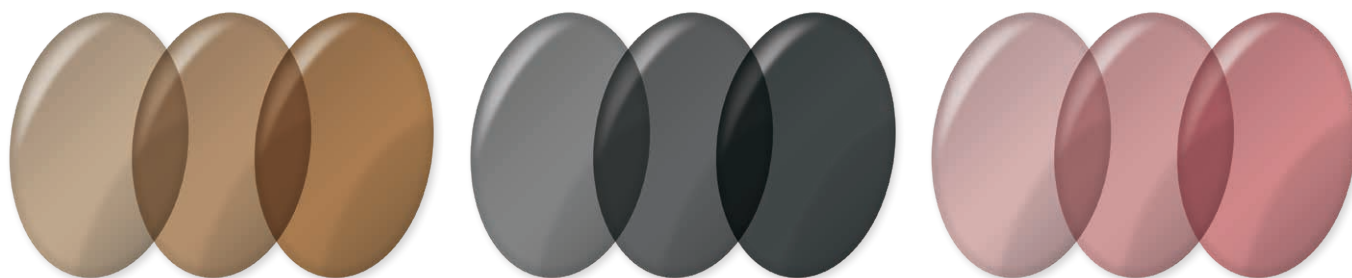

HD POLAR XTR A POLAR XTR

FUTURE TECHNOLOGY – WHERE EVERY DETAIL MATTERS

Advanced HD Contrast Boost technology redefines visibility in dynamic conditions. It enhances contrast and delivers a perfectly balanced color spectrum for superior image depth. The GlareBlock system eliminates both diffused and intense reflections from water, snow, and shiny surfaces. An innovative lens material ensures high mechanical durability, while the ultra-light construction offers unmatched comfort without compromise.

HD PolarXTR represents **the latest generation of polarized optics**, combining powerful **glare filtration** (GlareBlock), **HD Contrast Boost** technology, and maximum **optical clarity**, durability, and longevity thanks to polycarbonate (PC) lenses.

WHY CHOOSE HD POLAR XTR

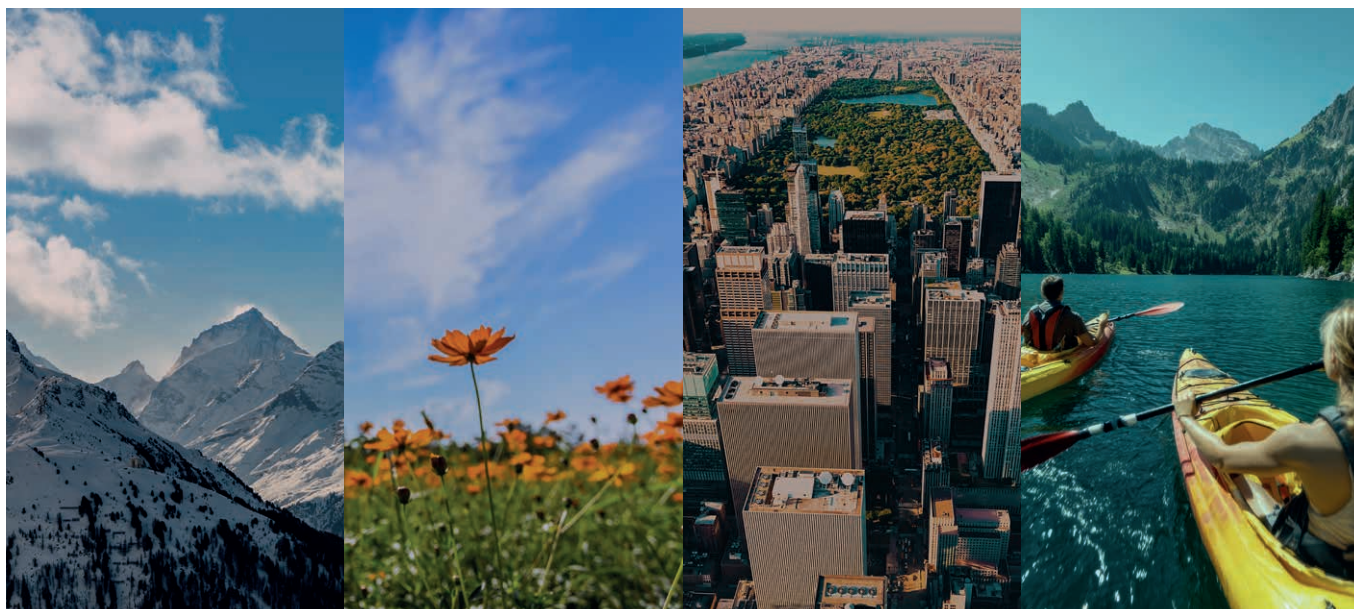

- Maximum contrast, minimal glare.
- Natural colors with zero distortion.
- Sharp, stable vision even in extreme conditions.
- Reduced eye strain, faster reaction time, and improved performance.

WHEN TO USE HD POLAR XTR & POLAR XTR

- **Cycling and running** – clear, uninterrupted vision in shifting light.
- **Water sports and paddleboarding** – no glare from the water surface.
- **Winter sports** – glare-free snow visibility and improved terrain readability.
- **Hiking and high-altitude adventures** – sharp detail even in intense light.
- **Driving** – polarizing filters cut glare from wet roads and car hoods.
- **Outdoor photography** – more accurate color perception and landscape clarity.
- **Everyday urban wear** – reflective surfaces won't wear out your eyes.

WHY CHOOSE HD POLAR XTR IN R2 EYEWEAR

- Highly durable **PC lenses** – safety, optical quality, and longevity.
- Advanced **GlareBlock** polarization – sharp, contrast-rich, stable vision.
- A significantly better choice than standard **TAC lenses**.
- Technology for those who want to **see the difference**.

RECOMMENDED HD TECH LENS COLORATION FOR VARIOUS ENVIRONMENTS

HD TECH

TAILORED TECHNOLOGY THAT SEES MORE

Experience a new dimension of visual perfection – extreme contrast, sharper details, and brighter colors. HD Tech lenses offer a revolutionary solution to visibility and color perception issues through intelligent regulation of the light spectrum. The unique capability of the HD Contrast Boost filter to precisely control light transmission redefines the limits of visibility in dynamic conditions, dramatically enhancing contrast and visual clarity across a wide range of lighting situations.

Sport-Calibrated Lenses. Performance Without Compromise

HD TECH is not a one-size-fits-all solution – each lens is tuned for a specific environment or sport. HD Tech lenses are precisely calibrated to the demands of individual activities and environments, selectively transmitting or filtering specific colors of the light spectrum to deliver the best possible visual experience – without compromise.

WHEN TO USE HD TECH

- **Road cycling** – enhances road surface contours, cracks, and small debris visibility, even in bright sunlight or changing light conditions.
- **Trail running** – improved terrain readability, including roots and rocks, even in shadows or overcast skies.
- **Winter sports** – precise perception of snow texture, icy patches, and surface irregularities, even with intense light reflection.
- **Water sports** – stable color perception and strong contrast despite intense surface glare.

WHY CHOOSE HD TECH IN R2 EYEWEAR

- Extreme contrast and sharpness for faster, more accurate reactions.
- Color balance for maximum visual comfort.
- Technology tailored to specific sports and environments.
- Advanced light filtration with HD Contrast Boost.

LENSES

CLEAR

Impact-resistant lens with a clear color. Suitable for reduced visibility as eye protection, for example in the early evening and evening against insects or dirt. It is most often offered as an additional replacement lens.

PURPLE

Impact-resistant lens with a purple tint. This lens color reduces brightness and is suitable for medium to low light conditions, where enhanced depth perception, color recognition, and contrast are needed.

BROWN

Impact-resistant lens with brown tint. They limit the transmission of the blue component of the light spectrum, thereby distorting the whole impression into a warmer rendering. They increase the transparency of vision by reducing blue light.

SMOKE

Impact-resistant lens with grey smoky tint. These lens colors render the individual colors of the light spectrum relatively undistorted and are thus suitable for all types of environments, but do not excel in any of them.

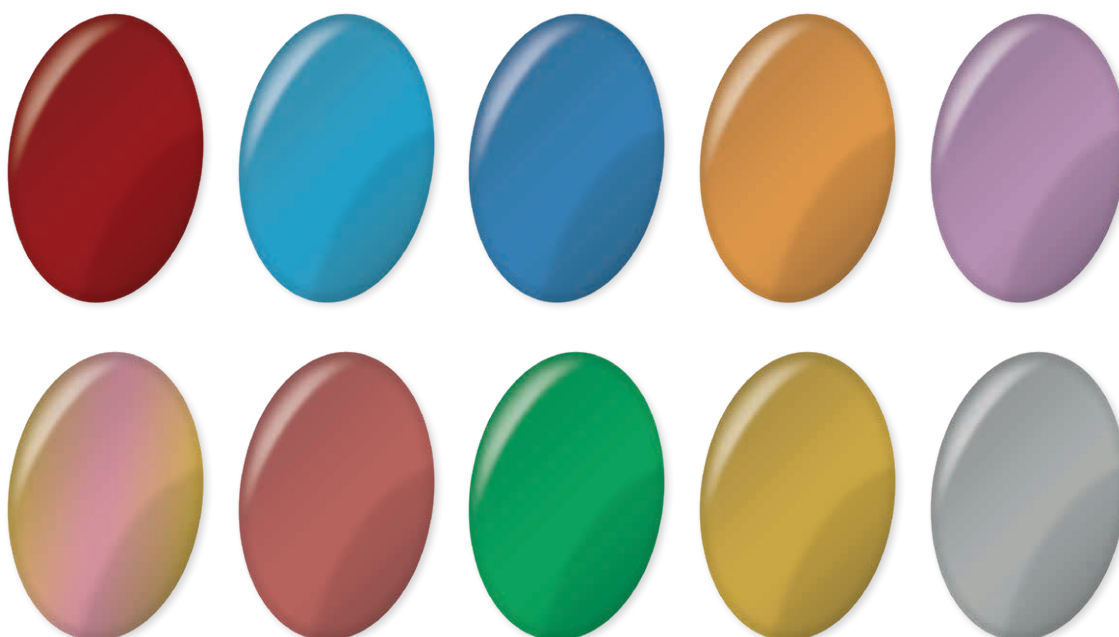

PINK

Impact-resistant lens with a pink tint. Significantly enhances contrast and color perception, making it ideal for outdoor activities and driving in low-light conditions. It reduces glare and improves the visibility of details.

CHROME

Various mirror coatings on the outside of the lenses play a role in both the aesthetic impression of the product and the final color perception when looking through the lenses. At R2, we are well aware of this, which is why we carefully match the base lens color with the mirror coating to ensure maximum user satisfaction—both in function and appearance. Every mirrored lens in the R2 collection undergoes a final **Platinum** treatment, which hardens the lens surface to reduce sensitivity to mirror scratching.

NANOSHIELD

MINIMAL MAINTENANCE. MAXIMUM COMFORT

Nanoshield technology was developed to provide maximum protection for lenses against dirt and scratches. Its advanced surface treatment creates an invisible protective barrier that lowers surface energy, significantly reducing the adhesion of contaminants such as fingerprints. The high-performance nano layer eliminates the capillary effect, allowing droplets to roll off quickly without streaking or smudging. The ultra-smooth surface with a low friction coefficient minimizes micro-damage, extends the lifespan of the optics, and enhances visual clarity. Thanks to its innovative structure, **Nanoshield** delivers worry-free lens use—without constant cleaning.

WHEN YOU'LL APPRECIATE NANOSHIELD THE MOST

- **During sports** – where sweat, dust, frequent handling, and sudden condition changes are common.
- **In everyday life** – glasses stay clean and scratch-free even with frequent putting on and taking off.
- **In rain and fog** – water flows off instantly, keeping your view crystal clear.

WHY CHOOSE NANOSHIELD IN R2 EYEWEAR

- Resistant to dirt, water, oil, and fingerprints.
- Significantly less cleaning – more efficient and gentle maintenance.
- Protection against micro-scratches – optics stay sharp longer.
- Longer lens lifespan = greater product value.
- Premium technology from high-end sports optics – now in R2 eyewear.

SALTSHIELD

MINIMAL MAINTENANCE. MAXIMUM COMFORT

Salt water and sweat can aggressively damage lens surfaces, causing stains, corrosion, and significantly reducing their lifespan. **SaltShield** is a premium protective technology that defends optics against the corrosive effects of saltwater and sweat-borne minerals. Designed for extreme conditions and an active lifestyle, **SaltShield** effectively prevents salt-related degradation and mineral buildup. Thanks to its innovative surface structure, it keeps lenses crystal clear, durable, and undamaged—extending both their life and optical performance.

WHEN YOU'LL APPRECIATE SALTSHIELD THE MOST

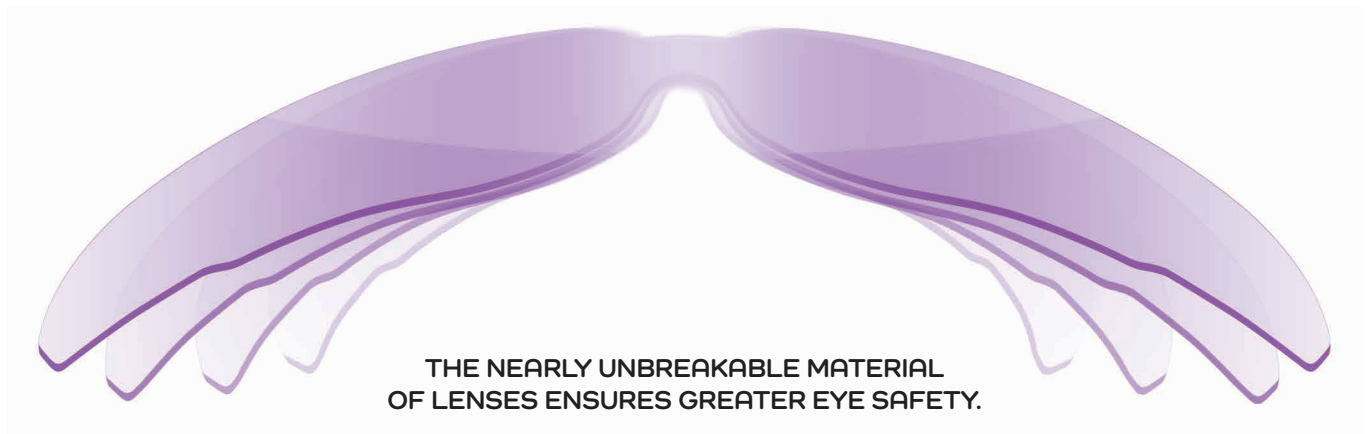

- **Water sports** – paddleboarding, windsurfing, kitesurfing, sailing.
- **Seaside activities** – relax or perform without worrying about lens damage.
- **Mountain climbs and summer runs** – protection from sweat during intense activity.
- **Heavy sweating during workouts** – e.g., training, cycling, or CrossFit. SaltShield prevents salt deposits and lens degradation.
- **Outdoor professions** – fishermen, lifeguards, sports coaches.

WHY CHOOSE SALTSHIELD IN R2 EYEWEAR

- Resistant to salts and minerals – no streaks, stains, or surface breakdown.
- Stable optical performance even in extreme conditions.
- Protection from corrosion, wear, and chemical exposure.
- Ideal for water sports, seaside environments, and summer training.

IMPACT PROTECTION

SUPERDURABLE TR90

EXTREMELY LIGHT AND YET VERY DURABLE HIGH-TEC MATERIAL WITH ABOVE-AVERAGE ATVAR ELASTICITY MEMORY, INCREASED WEARING COMFORT.

TR90 material is highly resistant material due to its exceptional flexibility and shape memory. It has been specially developed for extreme conditions, where maximum strength and minimum weight is in demand. Testing of this material showed that the TR90 is able to prolong 5× the useful life of the product. Due to high flexibility of the material, glasses are very comfortable to wear themselves.

BENEFITS

HD Photochromatic

Revolutionary optical technology with intelligent filtration, Adaptive LightSync system, and HD Contrast Boost ensures lightning-fast adaptation to changing light conditions, optimizes contrast, and delivers a new level of visual precision.

Photochromatic

Advanced photochromatic technology with UV-responsive adaptation ensures precise real-time lens adjustment, optimizes light transmission, and adapts lens tint for maximum visual comfort in every situation.

HD Pol XTR

Innovative HD Contrast Boost light filter technology with an integrated GlareBlock system redefines visibility in dynamic conditions. It eliminates diffuse and intense glare from water, snow, and reflective surfaces, delivering a perfectly balanced color spectrum.

HD Tech

HD Tech lenses offer a revolutionary solution tailored to specific sports and environments by addressing challenges in color perception. Thanks to the unique light-filtering capability of HD Contrast Boost, they dramatically enhance contrast and visual sharpness across a wide range of lighting conditions.

Polar XTR

The new generation of polarized lenses, Polar XTR, uses an innovative material with enhanced structural strength for maximum durability. Its advanced GlareBlock technology eliminates diffuse and intense glare from water, snow, and reflective surfaces, making it ideal for professional outdoor use, extreme conditions, and high-altitude optics.

Superdurable TR90

An extremely lightweight yet highly durable high-tech material with exceptional flexibility and shape memory – delivering enhanced wearing comfort.

Polarized

Lenses eliminate unwanted glare – ideal for sports, driving, and water activities. Polarization relieves eye strain and reduces fatigue.

Chrome

Significantly reduces eye strain with a special scratch-resistant mirrored lens that limits light transmission by reflecting excess brightness away from the eyes.

Impact Protection

Almost unbreakable lens material provides greater eye safety.

Pro Optic

Optional – removable diopter clip. Sunglasses can be used without clip.

Edging Suitable

Option to grind the dioptric lens directly into the frame of sports glasses.

XchangeView

Sunglasses that can adapt to weather conditions and actual situation by replacing various lenses.

Adjustable Temples

Adjustable temples to improve fit goggles on the face.

Flexipad

Adjustable for almost any face shape. Provides more comfort by wearing, the nosepad can be adjusted to the shape of the nose.

Adjustable Tips

Adjustable tips to improve the fit of the goggles.

AntiSlip

Pantislip tips and nose pads. Prevent slip sunglasses which holds perfectly on your face.

Ventilation System

Enables air flow through lenses which protects sunglasses from fogging.

Bifocal

Small dioptric field at the bottom of the lens for better reading.

Blue Block

Lens filter, eliminating harmful blue light. Reduces fatigue, headaches, has beneficial effects on sleep.

100% UV

100% protection against UV radiation A, B, C guarantee.

Nanoshield

A nano-coating that reduces the surface energy of the lens, minimizing the buildup of dust, fingerprints, and oils, while eliminating the capillary effect.

Saltshield

A special coating that protects lenses from the aggressive effects of saltwater, sea breeze, and sweat.

ATPRX	Optical clip, super light and durable made of TR90 grilamid, which is inserted into the glasses from the inside for use with a regular sun lens.	
ATPRX2	Plastic optical half rim TR90, to be inserted rightway instead of sun lens (ATPRX2A – clear, ATPRX2B – black, ATPRX2C – white).	
ATPRX3	Optical clip, super light and durable made of TR90 grilamid, which is inserted into the glasses from the inside for use with a regular sun lens.	
ATPRX4	Plastic optical enlarged clip TR90, which is applied from the inside of the frame. Ensures higher periferic vision.	
ATPRX5	Plastic optical enlarged clip TR90, which is applied from the inside of the frame. Thanks to bigger size, ensures higher comfort.	
ATPRX6	Metal optical clip, durable and more precise for the edging with aesthetic design.	
ATPRX7	Metal optical half rim, which is applied from the inside of the frame. Allows edging of hogher diopter range, thanks to its curvature in base 4.	
ATPRX9	Optical clip, super light and durable made of TR90 grilamid, which is inserted into the glasses from the inside for use with a regular sun lens.	

OPTICAL SOLUTIONS

LENS EDGING

If the glasses frame suits you so much that you want to use it as prescription glasses, we offer the option of edging the glasses lenses directly into selected frames.

OPTICAL INSERTS

ATPRX universal plastic optical clips that retain all the advantages are mirrored by the fact that the clip is intended to be original lens. In addition, the clip can be easily changed between several types sports glasses. The solution is simple and economical most favorable.

VARIABLE OPTICAL HALF RIM

ATPRX7 optical half rim for bestseller R2 Racer AT063 glasses, which is inserted directly into the glasses frame. Thanks to the smaller one curvature, a wider dispersion of diopters is possible, while the lightness and durability guarantee that you will not be limited in your sports activities.

OPTICAL HALF RIM

ATPRX2 optical half rim for the R2 Crown model series, which is embedded directly into the glasses frame. It stands out for its undistorted image and low weight. You can then be freely changed for sun lenses.

SUPER THIN OPTICAL INSERT

Metal optical clip for sports glasses ensures high durability and resistance to impacts. Thanks to flexibility and adaptability metal, the clip easily adapts to the glasses frame, provides a more aesthetic appearance and allows more precise grinding of dioptric lenses for maximum vision and comfort during sports activities.

BIFOCAL LENSES

A smart bifocal solution for those who already need to focus better while reading, we newly applied to clear photochromic glasses. The small dioptric field in the lower part of the lens does not interfere in any way good distance vision, but it will help a lot when needed focus close up.

HELMETS

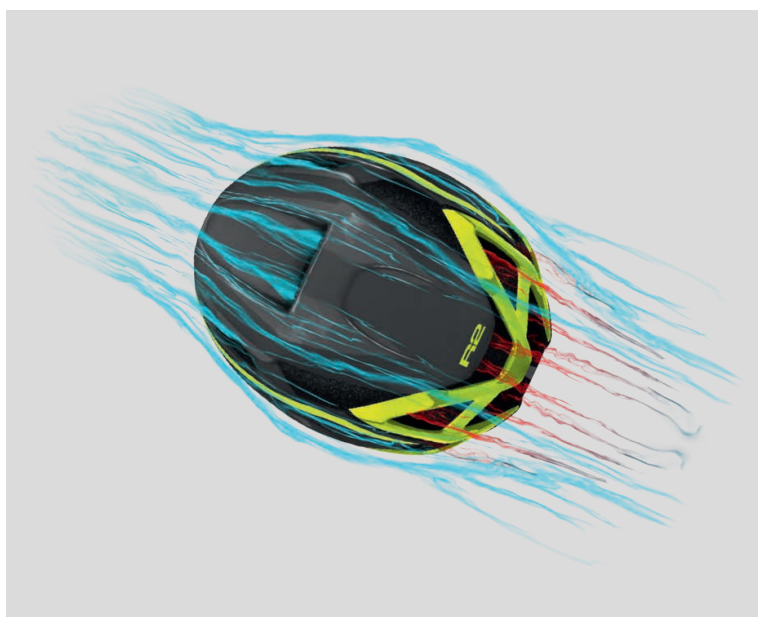

X-PROTECT

R2 products are made exclusively by athletes who test and use their own products. Without compromising we insist on the highest safety standards in the segment of bicycle helmets. Selected models with the X-PROTECT label are increasing their protective ability due to larger and reinforced critical parts. Thanks MOLD IN the same time we are able to produce very lightweight helmets with an excellent ventilation capability, which together guarantees a high comfort of use.

IN MOLD SHELL

Weight of the helmet is the key factor for comfort as well as as safety limit. Reduction of every gram of weight we take it as a challenge. IN MOLD technology is the most advanced method of production, thanks to which we are able to achieve the highest protective properties with the lowest possible weight. Durable helmet core made from hardened material / polystyrene is via heat and compression molding firmly connected with a polycarbonate shell. R2 helmets thanks to technology IN-MOLD excel in low overall weight. The compactness of the helmet improves shock absorption due to the better distribution of impact forces. We guarantee you that you will feel comfortable and safe throughout your journey. So ride with a R2 helmet and have a fun.

AIR FLOW

Recent surveys among athletes show that satisfaction with a bicycle helmet is most influenced by a factor how it feels comfortable to wear. Maximum comfort significantly affects the ability of the helmet adequately ventilate heat generated by sport activity. Great attention is therefore devoted to the maximum amount of openings and above all perfectly directed air flow inside the helmet. We strive to make the R2 helmet feel not only safe but also very comfortable throughout sports.

BENEFITS

Full Wrap In Mold

Perfect protection of the entire head circumference for maximum safety increase.

In-Mold Shell

Production technology, which makes the helmet of a single high-strength and lightweight unit.

X-protect

Increased security by increasing and intensifying the critical parts.

Dual Led light

Safety front white and rear red LEC lights.

Led light

Removable safety LED light provides go from visibility and increases passive protection for cyclists.

360 Wrap Fix

Innovative retention system for perfect fit and comfort. Evenly distributes pressure and prevents helmet movement even under high strain.

Ergo Fix

Fastening system that conforms to the shape and size of the head in two axes (vertical and horizontal). It can be manipulated with one hand using a pulling wheel.

Dual Fix

Sophisticated system that is most adapted to the shape and size of the head. It can be manipulated with one hand using a pulling wheel.

Easy Lock

Allows you to fasten / unfasten helmet with one hand.

Extra Padding

Spare removable and washable padding with bug net.

Bug Net

Prevents flying insects while riding.

E-bike safe

The helmet is certified for use on an electric bike.

CE - Safety Pro

We guarantee proved helmets safety.

GLOVES

ELASTIC PRO

ELASTIC PRO accepts individuality and uniqueness of each of us. R2 gloves are made from elastic materials in order to offer perfectly fitting gloves. That's why we use either a mesh or the Lycra. Netting itself is very elastic and also very well removes sweating. Lycra is a useful benefit in gloves when it is necessary high insulation properties while maintaining a sufficient degree of "breathing" materials.

EASY OFF

Technology of take down rings is a simple, but very useful benefit. Downloading sweaty gloves, their subsequent turning upside down, it's certainly not a popular discipline for athletes. Take down rings on gloves R2 greatly facilitate the whole process and so increase user comfort product again. They are also purposefully made from silicone so as to increase the slip properties of the glove.

PADDED PRO

The most important benefit of gloves is their user-friendliness. R2 gloves are personally tested permanently and in all weather conditions. All seams and padding are designed to provide a maximum comfort. The materials used are strictly ANTI SLIP to ensure safety and smooth grip. R2 gloves with padding PRO technology will make you feel confident and comfortable whenever you go for your sports experience.

BENEFITS

Reflectiv

Reflective elements increase athletes visibility.

Elastic Pro

Made from a flexible material that conforms well to the hands shape.

Breathable

Gloves breathe better and carry off the moisture of wet and heat.

Touch Pro

Touch screen usable.

Easy Off

Significantly facilitates removing.

AntiSlip

Anti-slip elements improve the safety of the handlebar grip.

Padded Pro

Padding reduces pressure sore in stressed areas.

Pro Gel

Gel reduces pressure sore in stressed areas.

Double Gel

Double gel padding eliminates bruises in stressed parts.

Join Protection

Thin gel padding at the finger joints to absorb shock. For rougher handling, more protection for hands during more predatory style of cycling.

Pro Wipe

Fleece surface for wiping.

AX Suede

Branded palm material specially designed for gloves that prioritize dexterity, strenght, high abrasion resistance, breathability, flexibility, softness, grip and a comfortable hand feel.

Skintec

Premium palm material characterized by strength, flexibility, abrasion resistance, but at the same time softness and pliability.

GripAir Flex

Premium palm material with high grip, softness, and flexibility ensures added comfort, cushioning, and abrasion resistance. Its anti-slip properties provide confident and controlled handlebar grip.

BACKPACKS

BENEFITS

Air Shield

Back system for quality ventilation, which increases wearing comfort.

EVA Pour

The parts of the backpack that are in contact with the body are softened with EVA foam for greater comfort.

Rain Cover

Raincoat for a backpack cleverly hidden in the lower part of the backpack.

Helmet Holder

Pocket with adjustable straps for carrying the helmet.

Chest Strap

Adjustable strap with a buckle connecting the shoulder straps for a more secure holding of the backpack on the body.

Tool Org

Storage organizer for the necessary tools.

H₂O Ready

Ready for a drinking bag.

Flexible Pockets

Flexible pockets for anything.

Ergo Straps

Ergonomically shaped shoulder straps for a perfect fit.

Vented Straps

Ventilated straps.

Waist Belt

Fastening belt in the hip area.

SHOES

BENEFITS

Dial Fast

The DIAL FAST system uses a mechanically precise rotary dial connected to a low-friction cable, which ensures even pressure distribution without deformation. Thanks to precisely adjustable regulation and fine-tuned compression, optimal fastening can be achieved at every point – even during the ride, with just one hand.

Eva Damper

EVA DAMPER is a key component in the construction of cycling footwear, providing active damping of impacts and micro-vibrations caused by contact with the pedals or riding over uneven terrain. The midsole is made from highly durable, shape-retaining EVA foam, whose optimized density and elasticity effectively absorb shocks during pedaling and reduce strain on the foot. The result is greater comfort, reduced muscle fatigue, and smoother power transfer to the pedals.

Cleats Ready

CLEATS READY means full compatibility with SPD pedal cleats. Thanks to the precisely defined cleat mounting zone and the stiff construction in the pedal area, the shoe provides immediate response to every movement without unwanted shifting or power loss.

Toe Guard

TOE GUARD adds a reinforced protective layer made of durable material that guards against scuffing, scratching, and wear. The tough, abrasion-resistant material prevents mechanical damage, and thanks to its firmly integrated design, the toe of the shoe stays protected even in the harshest conditions – without restricting movement or adding unnecessary weight.

SOCKS

BENEFITS

Moisture Guard

Ejects moisture perfectly for comfortable dry feeling.

Ergo Profile

Exact percentage of elastic material in composition guarantees the ideal ergonomomy to the socks.

360° Support

Elastic arch support creates perfect ergonomy of a sock.

Light Weight

Extra light breathable material helps the sock to fit like a second skin.

Endurance Pro Pad

Targeted reinforcements protect toes and heel.

Sens Toe Seam

Flat toe seam reduces the risk of unpleasant pressure during intensive workout.

Airflow Guide

Vented mesh ensures ideal air circulation.

Achilles Pro-T Zone

Reinforcement in Achilles tendon area prevents inconvenient scratch.

Quick Dry

Functional material of the sock dries quickly even during the intense workout.

Compress

The first stage of compression to improve performance and recovery after sports.

R/L Anatomical

Anatomic design for left and right feet.

Cotton

Sporty cotton sock. Created by pleasant feeling from natural material.

Merino

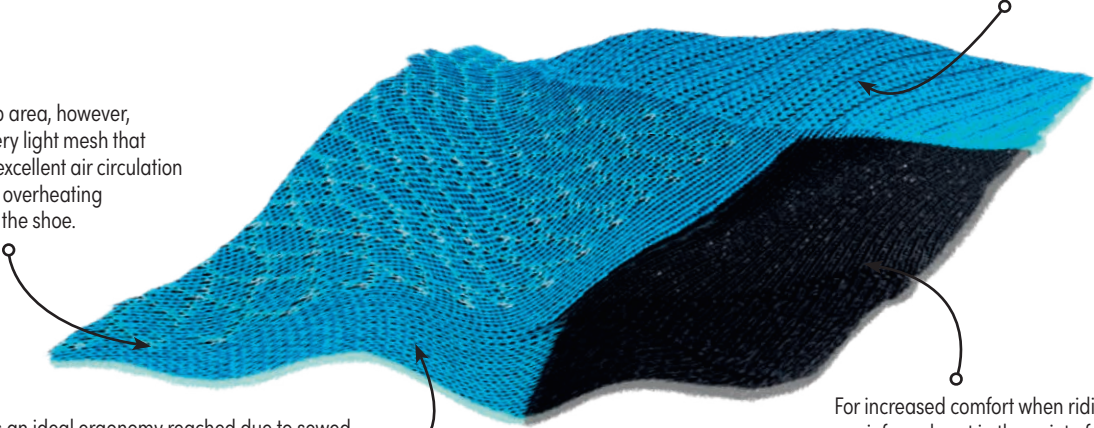

Extra fine merino wool in the composition increases thermal comfort in extreme conditions.

Label	S	M	L
Size	35-38	39-42	43-46

The R2 socks are made from the highest quality materials and thereby ensure the most effective use of the functionality of polyamide, polypropylene, Elastane, and also natural materials. After detailed research specialist achieved the ideal percentage in the composition and GSM of various parts of the socks.

Socks are reinforced in the most probable to bruising parts to protect them and gain maximum comfort.

On the instep area, however, is situated very light mesh that guarantees excellent air circulation and reduces overheating of the foot in the shoe.

There is an ideal ergonomomy reached due to sewed Elastane in exactly defined percentage, which makes the sock fit to the foot like a second skin.

For increased comfort when riding a bike, there is a reinforced part in the point of contact of the foot with the pedal.
