30 Years of RELAX

– A Czech Story That Inspires

RELAX is the only Czech brand of sunglasses and sports eyewear that has been on the market for 30 years.

And not only that – it has successfully expanded to neighboring countries and secured a solid place among international competitors.

The Beginnings: Young, Free, and Driven to Create

When we founded RELAX in 1996, we were young and eager to do things differently. The name “**RELAX**” was no coincidence – it perfectly expressed our approach to business: **easy-going, without suits, stiffness, or unnecessary prejudices.**

We wanted to bring a fresh breeze to a market that was divided between cheap noname products and expensive global brands. Right in between those extremes was a gap – the space we stepped into with RELAX. That proved to be the key to success.

The Early Years: Demand We Could Barely Keep Up With

From the very beginning, demand was so high that we could hardly keep up with production. RELAX eyewear quickly entered the portfolios of retailers who offered more than just “wire stands” – one of our key partners became **dm market**.

Our models appeared even on fashion shows in Pařížská Street and soon became sought-after trendy accessories. **Miss Kristýna Frídvalská** contributed significantly to giving RELAX a stylish, prestigious image in the eyes of the public.

Big Names and Collaborations

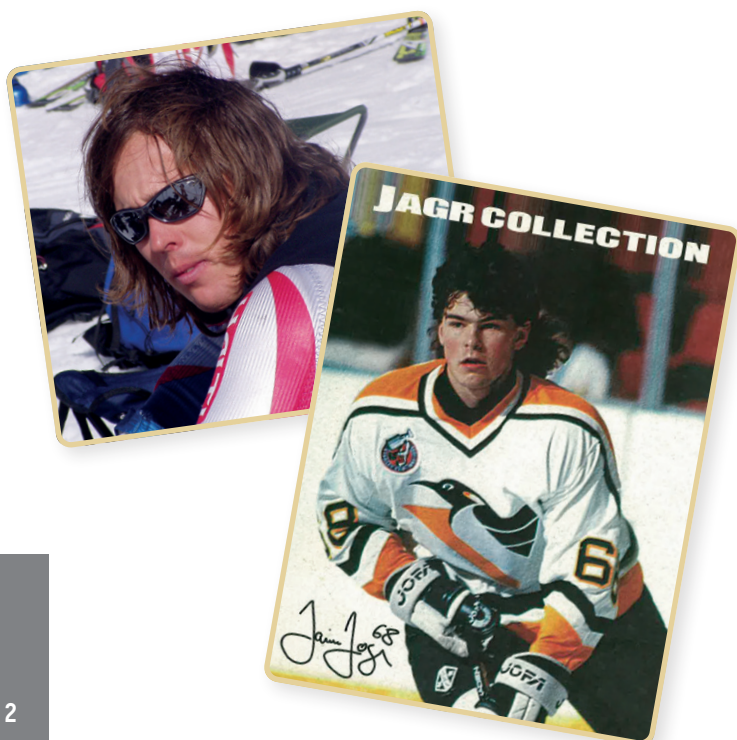

RELAX has always known how to connect with outstanding personalities. Our eyewear was worn and promoted by figures such as **Jaromír Jágr, Aleš Loprais, Ondřej Bank, Michal Suchánek and Richard Genzer**. These faces helped move the brand forward and proved that RELAX had something to say not only in fashion, but also in sports and lifestyle.

Thanks to our expertise, we also created **private collections** for a number of major brands, including **Škoda Auto, Fischer, H.I.S., WAW, Time Out**, and others. These experiences confirmed that RELAX had the know-how to succeed even on the global stage.

Collections, Sport, and New Brands

One of our most remarkable projects was the **Jágr Collection** – although it didn't bring long-term commercial success on its own, it gave RELAX enormous media visibility.

From RELAX's sports division came a new brand – **R2** – which has now become a well-known name in the world of cycling and sports optics.

RELAX

30 YEARS
RELAX

Expanding the Range and Entering Retail

RELAX was also the first Czech eyewear brand **to open its own concept stores in shopping centers**. Over time, our range expanded to include gloves, caps, ski helmets, and goggles. RELAX grew into a respected brand offering **attractive design, quality, and affordability**.

Optical Frames – A New Chapter

Alongside sunglasses and sports eyewear, RELAX is now thriving in the **optical frames** segment. Here too, we bring what makes RELAX unique – design, quality, and accessibility. This segment represents a major opportunity for the future, and customers appreciate that RELAX can provide a complete solution, whether they're looking for stylish sunglasses, sports models, or everyday optical frames.

The Future: A Brand for Everyone

We look to the future with optimism. RELAX has behind it three decades of growth – from a small Czech idea into a respected international brand.

Our vision is to keep pushing boundaries – advancing sustainability and ecology, embracing digitalization (virtual try-on, online services), expanding into new markets, and strengthening our optical frames segment.

RELAX has always been, and will continue to be, a brand that **combines attractive design, quality, and affordability**. A brand that grew from Czech roots, earned its place abroad, and still remains **a brand for everyone**.

RELAX

ECOFRIENDLY

RELAX ECO FRIENDLY BIO

We present you a sunglasses model that offer a greener alternative with reduced use of plastic. Our frames are made from 45% natural-based materials, significantly reducing fossil material consumption and CO₂ emissions. We use **G850** in the production of our models, which replaces phthalate-based plasticizers with organic additives.

This contributes to a cleaner atmosphere, water and soil. Choose RELAX and support a sustainable future!

RELAX ECO FRIENDLY FISHING NET

We offer a model made from **recycled fishing nets** – an ecological step towards a sustainable future.

These sunglasses are not only fashionable, but also contribute to the protection of the oceans. By using fishing nets that would otherwise pollute the sea, we are reducing plastic waste and promoting a cleaner and healthier environment.

Choose sunglasses that combine style and environmental responsibility. Wearing them not only makes you look great, but also makes you feel good about helping to **protect our planet**.

Finn
R1156A

RELAX

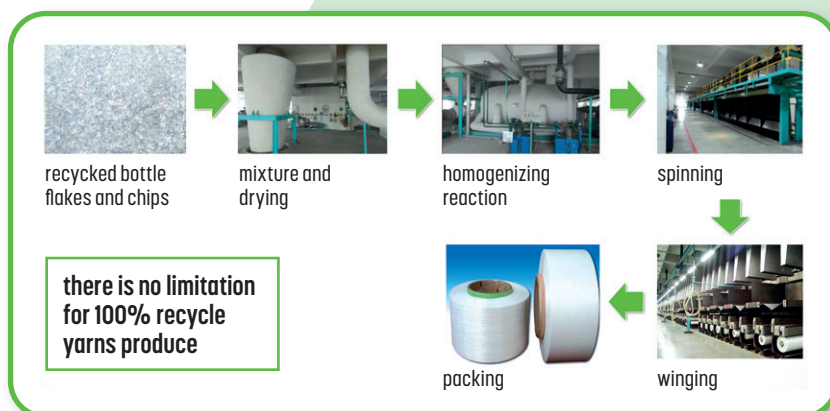

Lyra
R0371A

RELAX ECO FRIENDLY BIO

This is a sunglasses model made of **bioacetate**, thus classifying to our range of sustainable products. Bioacetate mixed with bio-softeners from renewable sources is not only biodegradable but also recyclable, contributing to a sustainable lifestyle. Thanks to the special formulation, our sunglasses break down quickly and safely, with no negative impact on the planet. Choose our eco-friendly sunglasses and support a healthier planet.

THE PRODUCTION PROCEDURE OF RECYCLED YARNS

The ECO-friendly microfiber pouch is made from recycled material. Used plastics are first ground into small flakes – so-called chips – from which new fiber is then produced. This fiber is woven into a high-quality fabric that is strong, lightweight, and gentle on nature. As a result, the pouch not only protects your glasses but also helps reduce the amount of plastic waste.

WHAT'S NEW

For demanding adventurers and high-altitude hiking enthusiasts, the **MONT BLANC** model has arrived. These sunglasses with a category 4 filter provide maximum protection in extremely sunny conditions. Removable side shields protect against glare from the sides and allow flexible adjustment. The frame, made of flexible nylon, ensures durability, lightness, and all-day comfort.

The collection is also expanding with two new shield models – **JUMP** and **HILL**. Both combine sporty elegance with functional design, ideal for an active lifestyle as well as everyday wear. JUMP stands out with its dynamic shape and lightness, while HILL offers a more robust construction and a wider field of vision. In addition, our proven bestsellers **GULL** and **LANTAO** have been enriched with new color variants, ranging from subtle tones to bold shades for the daring. And we did not forget the youngest – the **STAR** model is a lightweight and comfortable children's shield from the age of 7, which reliably protects the eyes during outdoor play and trips. The colorful design will delight not only children but also parents with a sense of style.

Colors have always played an important role in our collection, and therefore this year we are bringing new trendy shades that refresh the classic models. The elegant **LEILANI** and **FLORA** appear in a soft crystal brown, giving a natural and sophisticated impression. The women's flattop **LUNA** this year comes in a minimalist gray-on-gray combination, the unisex **ST. BARTS** shines in pure white, and the men's bestseller **PALAVAN** arrives in a new blue tone that adds energy and freshness.

Luna
R0363

Fleur
R0370

Trend and technology blend perfectly in the women's model **FLEUR**, which this year brings playful summer colors. It is fitted with a special **nylon lens** offering high optical clarity, exceptional impact resistance, and low weight. Nylon is flexible, does not deform, and provides reliable UV protection, making FLEUR an ideal companion for active summer days full of sunshine.

Other remarkable newcomers are the **PORG** and **VELIN** models. We discovered Porg at the world exhibition in Milan, Italy, and were immediately captivated by its lightness, original shape, and urban elegance with a touch of Italian charm. Velin, on the other hand, bears the hallmark of French style – it was created in the very heart of Paris and stands out with its delicacy, sophistication, and timeless elegance. Two worlds, two inspirations, two personalities – which will you choose, Italian energy or French charm?

Accessories

TECHNOLOGY / LENSES

POLARIZED

Proven technology reducing transmission of reflected light from horizontal surfaces such as snow, water or wet asphalt. Polarized lenses greatly increase visual acuity, reduce glare and eliminate annoying reflections. Polarization helps eyes to reduce their fatigue. Suitable for sport, driving, water activities.

PLATINUM LENSES

Lenses covered in a special abrasion resistant mirror layer which significantly reduces the amount of light reaching your eyes by simply reflecting most of it. This means less strain on your eyes, making it easier for you to see.

You can choose from all colours of the rainbow. Besides the platinum treatment is wipe-resistant.

GRADIENT LENSES

Lenses shaded from top to bottom, where the upper part is darker and the lower part is lighter. Looking through such lenses is more comfortable, natural and handy e.g. while driving. They allow great sight, protect your eyes from the light from above while you see undistorted what is below you. They look fantastic and are elegant because they bring a certain depth to one's features.

IMPACT PROTECTION

Impact protection technology uses a nearly unbreakable lens material that provides a high level of eye protection.

This material resists impact and minimizes the risk of lens damage or breakage during sports and outdoor activities. This makes the glasses safe and reliable even in challenging conditions.

TECHNOLOGY / FRAMES

TR90

TR90 technology uses a special thermoplastic material that is extremely lightweight, flexible and durable. This material provides a high level of wearing comfort as it easily conforms to the shape of the head while withstanding even the most demanding conditions. Sunglasses made of TR90 are also resistant to impact and deformation, making them ideal for sports and outdoor activities.

FLEXIPAD

The Flexi Pad technology ensures maximum comfort thanks to flexible nose pads that adapt to the shape of the face. Thanks to this technology, the sunglasses fit perfectly and minimize pressure on the nose, which increases comfort during long-term wear. In addition, the Flexi Pad ensures the stability of the sunglasses even during sports activities.

ANTISLIP

Anti-Slip technology ensures that the sunglasses stay firmly in place thanks to special non-slip elements on the nosepads and earpieces. This surface increases the stability of the sunglasses, whether during sports or normal wear, and prevents slipping even when sweating or sudden movements. Anti-Slip technology provides comfort and confidence that the sunglasses will stay in place in any situation.

100% UV 400

Glasses with 100% UV400 protection provide complete protection against harmful ultraviolet radiation, shielding the eyes from both UVA and UVB rays. This level of filtration ensures that your eyes are protected from potentially dangerous sunlight – wherever you are in the sun.

GUARANTEE
UV 400nm

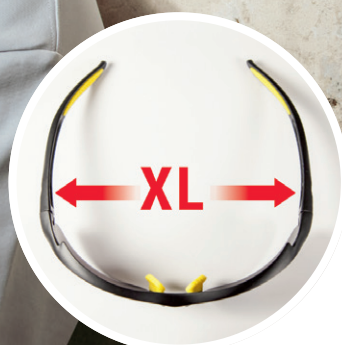

TECHNOLOGY

SIZE XL

The XL size sunglasses are designed for wider faces to ensure a comfortable fit without uncomfortable pressure. This larger size not only offers better eye coverage, but also a modern and distinctive look.

SIZE XS

The XS size sunglasses are ideal for small or narrow faces where they provide a comfortable and secure fit. Their compact size provides a sleek look and a perfect fit without excessive protrusion.

SOFT CASE

The soft microfiber cleaning pouch protect sunglasses against scratches. FREE with every pair of sunglasses.

CE – SAFETY PRO

Guaranteed safety of Relax sunglasses.

DESIGNED IN CZ

All Relax products are developed and designed in the Czech Republic.

Lens colour

**CLOUD
Grey**

Universal use. Makes your vision brighter. High elimination of reflections.

These lenses are suitable for all weather conditions, especially then in bright light. With their soft tone they improve sight comfort in any situation.

**BRONZE
Brown**

Sharper sight. Reduces eyestrain.

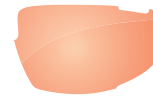

These lenses absorb the natural blue light around us and help to sharpen the sight. The BRONZE tone was specially designed to provide greater contrast in low light conditions. These lenses help to reduce the eyestrain.

**PARK
Green**

Makes your vision brighter. Colour brightness.

Grey-green lenses sharpen the sight and eliminate colour distortion. They naturally block most of the blue light around us providing greater sight clarity and create beautiful colour contrast.

**LUNAR
Orange**

Universal use. Best for sport.

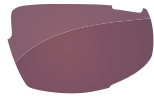

Popular colour for any sport activities because of its universality. Lets in greater spectrum of light and therefore is suitable for bright as well as for dark conditions.

**AMBER
Yellow**

Makes your vision brighter. Ideal for cloudy weather.

AMBER lenses increase the contrast and clarity of sight. These lenses are suitable for partly cloudy and cloudy weather.

**ROSE
Pink**

Universal use. High sharpness and contrast.

Truly universal lenses colour suitable for a wide range of light conditions. Pink colour maximizes the depth of sharpness and contrast.

**CRYSTAL
Clear**

Eye protection. Ideal for cloudy weather.

Total clarity makes it easy to see even in the darkest conditions.

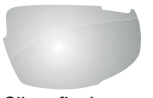

**SKY
blue**

Colour brightness. Eliminates reflections.

Creates beautiful colour contrast, improves colour perception.

Alex

RM162C2/RM162C3

OPTICAL FRAMES

Alex

RM162

The RELAX Alex model is a fashion firework — the classic round shape is brought to life with bold colors that will make you shine. A great choice especially for young people who want style and a practical sun clip always at hand.

TECHNOLOGY

FLEX

Flexible FLEX hinge at the temple and frame joint makes the putting-on easier, extends glasses' lifespan and increases comfort.

FLEXIPAD

Adjustable nosepad that can be adapted to wearer's nose and that fits perfectly. Ensures better comfort.

ULTEM

Temples from lightweight ULTEM plastic are characterized by an exceptional durability, flexibility and shape stability. Glasses with these temples are very light, thermally stable and hypoallergenic.

SUN CLIP (POLARIZED)

Magnetic polarized sun clip that can be easily click on or take off at any time. Simple, practical and yet elegant solution to sunny days.

OPTICAL FRAMES

PLATINUM LENSES

Lenses covered by a special abrasion resistant mirror layer which significantly reduces the light reaching your eyes by simply reflecting most of it. Moreover the platinum lenses are wipe resistant.

HARD CASE

Hard case for free with every pair of Relax optical frames.

CE – SAFETY PRO

Guaranteed safety of Relax optical frames.

DESIGNED IN CZ

All Relax products are developed and designed in the Czech republic.
