AT124 ARCYON**A NEW DIMENSION OF VISION**

ARCYON brings a completely new perspective to the R2 sports eyewear collection. Its futuristic design with a unique reverse lens follows the natural contours of the face more closely, aligns with the cheekbone line, and provides an exceptionally wide field of vision. The result is a clean design, outstanding comfort, and an unobstructed viewing experience. The AT124C version features HD Tech technology, enhancing contrast and helping you perceive details more clearly in your surroundings. The model is also available in a refined violet crystal frame with a matching lens, further emphasizing its distinctive character.

**AT126 RIDGE****READY FOR EVERY JOURNEY**

RIDGE is an all-new model line designed for those who refuse to be limited to a single path. It combines an outdoor spirit with the performance needed for MTB riding and other off-road adventures. Removable side shields provide additional protection in demanding conditions and allow the eyewear to adapt to different activities. The model is available in both a photochromic version and a version equipped with an HD Off-Road lens, which enhances contrast and helps you read the terrain more effectively. The grey metallic frame reinforces the model's technical character and gives RIDGE a distinctive look, ready for any challenge.

AT100 FLUKE**WHERE PERFORMANCE MEETS COLOR**

FLUKE expands the photochromic eyewear range with a striking metallic pink edition. For the first time, it brings Photochromic technology to a truly women-focused design, combining sports performance with distinctive style. The lens automatically adapts to changing light conditions, providing comfortable vision throughout the day. FLUKE proves that top-level functionality and an eye-catching look can go hand in hand.

**AT114 BOOST****THE CLEAR CHOICE FOR BEACH VOLLEYBALL**

BOOST expands its range with a version featuring HD PolarXTR technology, designed for beach volleyball and other sports performed in glare-intensive environments. This next-generation polarized optics enhances contrast, reduces reflections from sand and water, and delivers clearer, more relaxed vision. NanoShield technology further protects the lens surface and helps maintain optical clarity even during intensive use. With BOOST, you'll always stay in control of the game.

HD PHOTOCROMIC

A NEW DIMENSION OF LIGHT ADAPTATION

The revolutionary HD Photochromic optical technology represents the pinnacle of innovation in adaptive vision. The advanced Adaptive LightSync system detects UV radiation and automatically adjusts lens tint in real time, ensuring perfect visibility without loss of sharpness.

HD Photochromic eyewear is far more than ordinary “darkening” lenses. It’s intelligent adaptive optics that:

- Reacts almost instantly to changing light conditions.
- Eliminates glare and protects your eyes.
- Enhances details and terrain contours with HD Contrast Boost technology.
- Provides visual comfort without eye fatigue.

WHEN TO USE HD PHOTOCROMATIC

- **Cycling in the forest or on the road** – the glasses respond for you – smooth and safe vision.
- **Mountain hikes with sun, snow, and fog** – one pair of glasses for all conditions.
- **Running or hiking** – always the ideal light transmission.

WHY CHOOSE HD PHOTOCROMATIC IN R2 EYEWEAR

- Cutting-edge adaptive vision technology.
- Uncompromised clarity.
- Glasses that adapt to your environment.
- Perfect for both sports and everyday wear.

PHOTOCHROMIC

PRECISE LIGHT ADAPTATION FOR MAXIMUM PERFORMANCE

Advanced lens brightness adaptation technology ensures real-time precision adjustment to surrounding light conditions. Thanks to its highly sensitive response, the photochromatic layer actively reacts to UV intensity, optimizing light transmission and tint for maximum visibility.

Always the Right Brightness Level

Whether you're in the city, nature, mountains, or under clouds, this auto-adaptive system delivers ideal brightness and contrast without any loss of visual quality. The ultra-fast light exposure adjustment guarantees instant adaptation to every situation for perfect visual comfort.

NO CHROME

WITH CHROME

WHEN TO USE R2 PHOTOCROMATIC

- **Cycling off-road or on the road** – Photochromatic lenses ensure clear terrain visibility and glare protection, whether in sunlight or shadow.
- **Trail running in the mountains** – Transition seamlessly between bright alpine light and shaded forest paths without losing terrain awareness.
- **Outdoor climbing** – Safer vision on ever-changing rock faces, with lighting conditions shifting by orientation and elevation.
- **Golf or shooting sports** – Subtle light adjustments help maximize focus and aiming precision in any weather.
- **Travel and hiking** – Smooth transitions from open sunny plains into shaded valleys – no need to change your glasses.

WHY CHOOSE PHOTOCROMATIC IN R2 EYEWEAR

- Real-time automatic light adaptation.
- No blinding glare or loss of contrast.
- Ideal for environments with constantly changing light.
- UV protection and clear vision without thinking twice.
- Technology designed for those who want confidence in every step and every view.

HD POLAR XTR A POLAR XTR

FUTURE TECHNOLOGY – WHERE EVERY DETAIL MATTERS

Advanced HD Contrast Boost technology redefines visibility in dynamic conditions. It enhances contrast and delivers a perfectly balanced color spectrum for superior image depth. The GlareBlock system eliminates both diffused and intense reflections from water, snow, and shiny surfaces. An innovative lens material ensures high mechanical durability, while the ultra-light construction offers unmatched comfort without compromise.

HD PolarXTR represents **the latest generation of polarized optics**, combining powerful **glare filtration** (GlareBlock), **HD Contrast Boost** technology, and maximum **optical clarity**, durability, and longevity thanks to polycarbonate (PC) lenses.

WHY CHOOSE HD POLAR XTR

- Maximum contrast, minimal glare.
- Natural colors with zero distortion.
- Sharp, stable vision even in extreme conditions.
- Reduced eye strain, faster reaction time, and improved performance.

WHEN TO USE HD POLAR XTR & POLAR XTR

- **Cycling and running** – clear, uninterrupted vision in shifting light.
- **Water sports and paddleboarding** – no glare from the water surface.
- **Winter sports** – glare-free snow visibility and improved terrain readability.
- **Hiking and high-altitude adventures** – sharp detail even in intense light.
- **Driving** – polarizing filters cut glare from wet roads and car hoods.
- **Outdoor photography** – more accurate color perception and landscape clarity.
- **Everyday urban wear** – reflective surfaces won't wear out your eyes.

WHY CHOOSE HD POLAR XTR IN R2 EYEWEAR

- Highly durable **PC lenses** – safety, optical quality, and longevity.
- Advanced **GlareBlock** polarization – sharp, contrast-rich, stable vision.
- A significantly better choice than standard **TAC lenses**.
- Technology for those who want to **see the difference**.

RECOMMENDED HD TECH LENS COLORATION FOR VARIOUS ENVIRONMENTS

HD TECH

TAILORED TECHNOLOGY THAT SEES MORE

Experience a new dimension of visual perfection – extreme contrast, sharper details, and brighter colors. HD Tech lenses offer a revolutionary solution to visibility and color perception issues through intelligent regulation of the light spectrum. The unique capability of the HD Contrast Boost filter to precisely control light transmission redefines the limits of visibility in dynamic conditions, dramatically enhancing contrast and visual clarity across a wide range of lighting situations.

Sport-Calibrated Lenses. Performance Without Compromise

HD TECH is not a one-size-fits-all solution – each lens is tuned for a specific environment or sport. HD Tech lenses are precisely calibrated to the demands of individual activities and environments, selectively transmitting or filtering specific colors of the light spectrum to deliver the best possible visual experience – without compromise.

WHEN TO USE HD TECH

- **ROAD – road cycling** – enhances the visibility of road contours, cracks, and gravel, even in bright sunlight or changing light conditions.
- **OFF-ROAD – MTB, gravel** – improves terrain readability, highlighting roots, rocks, and uneven surfaces, even in shadows or overcast conditions.
- **OUTDOOR – trail running, hiking, trekking** – enhances contrast in natural environments, making terrain easier to read while revealing uneven ground and surface details.
- **FUN SPORT – beach volleyball, water sports** – delivers excellent color stability and enhanced contrast in environments with strong glare reflected from the water.
- **SNOW – winter sports** – provides exceptional definition of snow texture, icy patches, and terrain irregularities in highly reflective light conditions.
- **URBAN** – enhances contrast and visual sharpness in urban environments, highlighting road markings, traffic signs, road surfaces, and other important details.

WHY CHOOSE HD TECH IN R2 EYEWEAR

- Extreme contrast and sharpness for faster, more accurate reactions.
- Color balance for maximum visual comfort.
- Technology tailored to specific sports and environments.
- Advanced light filtration with HD Contrast Boost.

LENSES

CLEAR

Impact-resistant lens with a clear color. Suitable for reduced visibility as eye protection, for example in the early evening and evening against insects or dirt. It is most often offered as an additional replacement lens.

PURPLE

Impact-resistant lens with a purple tint. This lens color reduces brightness and is suitable for medium to low light conditions, where enhanced depth perception, color recognition, and contrast are needed.

BROWN

Impact-resistant lens with brown tint. They limit the transmission of the blue component of the light spectrum, thereby distorting the whole impression into a warmer rendering. They increase the transparency of vision by reducing blue light.

SMOKE

Impact-resistant lens with grey smoky tint. These lens colors render the individual colors of the light spectrum relatively undistorted and are thus suitable for all types of environments, but do not excel in any of them.

PINK

Impact-resistant lens with a pink tint. Significantly enhances contrast and color perception, making it ideal for outdoor activities and driving in low-light conditions. It reduces glare and improves the visibility of details.

CHROME

Various mirror coatings on the outside of the lenses play a role in both the aesthetic impression of the product and the final color perception when looking through the lenses. At R2, we are well aware of this, which is why we carefully match the base lens color with the mirror coating to ensure maximum user satisfaction—both in function and appearance. Every mirrored lens in the R2 collection undergoes a final **Platinum** treatment, which hardens the lens surface to reduce sensitivity to mirror scratching.

NANOSHIELD

MINIMAL MAINTENANCE. MAXIMUM COMFORT

Nanoshield technology was developed to provide maximum protection for lenses against dirt and scratches. Its advanced surface treatment creates an invisible protective barrier that lowers surface energy, significantly reducing the adhesion of contaminants such as fingerprints. The high-performance nano layer eliminates the capillary effect, allowing droplets to roll off quickly without streaking or smudging. The ultra-smooth surface with a low friction coefficient minimizes micro-damage, extends the lifespan of the optics, and enhances visual clarity. Thanks to its innovative structure, **Nanoshield** delivers worry-free lens use—without constant cleaning.

WHEN YOU'LL APPRECIATE NANOSHIELD THE MOST

- **During sports** – where sweat, dust, frequent handling, and sudden condition changes are common.
- **In everyday life** – glasses stay clean and scratch-free even with frequent putting on and taking off.
- **In rain and fog** – water flows off instantly, keeping your view crystal clear.

WHY CHOOSE NANOSHIELD IN R2 EYEWEAR

- Resistant to dirt, water, oil, and fingerprints.
- Significantly less cleaning – more efficient and gentle maintenance.
- Protection against micro-scratches – optics stay sharp longer.
- Longer lens lifespan = greater product value.
- Premium technology from high-end sports optics – now in R2 eyewear.

SALTSHIELD

MINIMAL MAINTENANCE. MAXIMUM COMFORT

Salt water and sweat can aggressively damage lens surfaces, causing stains, corrosion, and significantly reducing their lifespan. **SaltShield** is a premium protective technology that defends optics against the corrosive effects of saltwater and sweat-borne minerals. Designed for extreme conditions and an active lifestyle, **SaltShield** effectively prevents salt-related degradation and mineral buildup. Thanks to its innovative surface structure, it keeps lenses crystal clear, durable, and undamaged—extending both their life and optical performance.

WHEN YOU'LL APPRECIATE SALTSHIELD THE MOST

- **Water sports** – paddleboarding, windsurfing, kitesurfing, sailing.
- **Seaside activities** – relax or perform without worrying about lens damage.
- **Mountain climbs and summer runs** – protection from sweat during intense activity.
- **Heavy sweating during workouts** – e.g., training, cycling, or CrossFit. SaltShield prevents salt deposits and lens degradation.
- **Outdoor professions** – fishermen, lifeguards, sports coaches.

WHY CHOOSE SALTSHIELD IN R2 EYEWEAR

- Resistant to salts and minerals – no streaks, stains, or surface breakdown.
- Stable optical performance even in extreme conditions.
- Protection from corrosion, wear, and chemical exposure.
- Ideal for water sports, seaside environments, and summer training.

IMPACT PROTECTION

THE NEARLY UNBREAKABLE MATERIAL
OF LENSES ENSURES GREATER EYE SAFETY.

SUPERDURABLE TR90

EXTREMELY LIGHT AND YET VERY DURABLE HIGH-TEC MATERIAL WITH ABOVE-AVERAGE ATVAR ELASTICITY MEMORY, INCREASED WEARING COMFORT.

TR90 material is highly resistant material due to its exceptional flexibility and shape memory. It has been specially developed for extreme conditions, where maximum strength and minimum weight is in demand. Testing of this material showed that the TR90 is able to prolong 5× the useful life of the product. Due to high flexibility of the material, glasses are very comfortable to wear themselves.

BENEFIT

HD Photochromic

Revolutionary optical technology with intelligent filtration, Adaptive LightSync system, and HD Contrast Boost ensures lightning-fast adaptation to changing light conditions, optimizes contrast, and delivers a new level of visual precision.

Photochromic

Advanced photochromatic technology with UV-responsive adaptation ensures precise real-time lens adjustment, optimizes light transmission, and adapts lens tint for maximum visual comfort in every situation.

HD Pol XTR

Innovative HD Contrast Boost light filter technology with an integrated GlareBlock system redefines visibility in dynamic conditions. It eliminates diffuse and intense glare from water, snow, and reflective surfaces, delivering a perfectly balanced color spectrum.

HD Tech

HD Tech lenses offer a revolutionary solution tailored to specific sports and environments by addressing challenges in color perception. Thanks to the unique light-filtering capability of HD Contrast Boost, they dramatically enhance contrast and visual sharpness across a wide range of lighting conditions.

Polar XTR

The new generation of polarized lenses, Polar XTR, uses an innovative material with enhanced structural strength for maximum durability. Its advanced GlareBlock technology eliminates diffuse and intense glare from water, snow, and reflective surfaces, making it ideal for professional outdoor use, extreme conditions, and high-altitude optics.

Chrome

Significantly reduces eye strain with a special scratch-resistant mirrored lens that limits light transmission by reflecting excess brightness away from the eyes.

Impact Protection

Almost unbreakable lens material provides greater eye safety.

Superdurable TR90

An extremely lightweight yet highly durable high-tech material with exceptional flexibility and shape memory – delivering enhanced wearing comfort.

Pro Optic

Optional – removable diopter clip. Sunglasses can be used without clip.

Edging Suitable

Option to grind the dioptric lens directly into the frame of sports glasses.

Adjustable Temples

Adjustable temples to improve fit goggles on the face.

Flexipad

Adjustable for almost any face shape. Provides more comfort by wearing, the nosepad can be adjusted to the shape of the nose.

Adjustable Tips

Adjustable tips to improve the fit of the goggles.

AntiSlip

PAntislip tips and nose pads. Prevent slip sunglasses which holds perfectly on your face.

Ventilation System

Enables air flow through lenses which protects sunglasses from fogging.

Bifocal

Small dioptric field at the bottom of the lens for better reading.

Blue Block

Lens filter, eliminating harmful blue light. Reduces fatigue, headaches, has beneficial effects on sleep.

100% UV

100% protection against UV radiation A, B, C guarantee.

Nanoshield

A nano-coating that reduces the surface energy of the lens, minimizing the buildup of dust, fingerprints, and oils, while eliminating the capillary effect.

Saltshield

A special coating that protects lenses from the aggressive effects of saltwater, sea breeze, and sweat.

CE - Safety Pro

Certification CE.

ATPRX	Optical clip, super light and durable made of TR90 grilamid, which is inserted into the glasses from the inside for use with a regular sun lens.	
ATPRX2	Plastic optical half rim TR90, to be inserted rightway instead of sun lens (ATPRX2A – clear, ATPRX2B – black, ATPRX2C – white).	
ATPRX3	Optical clip, super light and durable made of TR90 grilamid, which is inserted into the glasses from the inside for use with a regular sun lens.	
ATPRX4	Plastic optical enlarged clip TR90, which is applied from the inside of the frame. Ensures higher periferic vision.	
ATPRX5	Plastic optical enlarged clip TR90, which is applied from the inside of the frame. Thanks to bigger size, ensures higher comfort.	
ATPRX6	Metal optical clip, durable and more precise for the edging with aesthetic design.	
ATPRX7	Metal optical half rim, which is applied from the inside of the frame. Allows edging of hogher diopter range, thanks to its curvature in base 4.	
ATPRX9	Optical clip, super light and durable made of TR90 grilamid, which is inserted into the glasses from the inside for use with a regular sun lens.	

PRO OPTIC PROGRAM

LENS EDGING

If the glasses frame suits you so much that you want to use it as prescription glasses, we offer the option of edging the glasses lenses directly into selected frames.

INSERTS

the advantages are mirrored by the fact that the clip is intended to be original lens. In addition, the clip can be easily changed between several types sports glasses. The solution is simple and economical most favorable.

ADJUSTABLE DIRECT CLIP

ATPRX7 optical half rim for bestseller R2 Racer AT063 glasses, which is inserted directly into the glasses frame. Thanks to the smaller one curvature, a wider dispersion of diopters is possible, while the lightness and durability guarantee that you will not be limited in your sports activities.

OPTICAL DIRECT CLIP

ATPRX2 optical direct clip for the R2 Crown model series, which is embedded directly into the glasses frame. It stands out for its undistorted image and low weight. You can then be freely changed for sun lenses.

ULTRA-THIN INSERT

Metal optical clip for sports glasses ensures high durability and resistance to impacts. Thanks to flexibility and adaptability metal, the clip easily adapts to the glasses frame, provides a more aesthetic appearance and allows more precise grinding of dioptric lenses for maximum vision and comfort during sports activities.

BIFOCAL LENSES

A smart bifocal solution for those who already need to focus better while reading, we newly applied to clear photochromic glasses. The small dioptric field in the lower part of the lens does not interfere in any way good distance vision, but it will help a lot when needed focus close up.

HELMETS

X-PROTECT

R2 products are made exclusively by athletes who test and use their own products. Without compromising we insist on the highest safety standards in the segment of bicycle helmets. Selected models with the X-PROTECT label are increasing their protective ability due to larger and reinforced critical parts. Thanks MOLD IN the same time we are able to produce very lightweight helmets with an excellent ventilation capability, which together guarantees a high comfort of use.

DUAL LED LIGHT

Dual LED Light technology provides enhanced visibility from both directions – without the need for additional accessories. The integrated white front light illuminates the road ahead, while the red rear light clearly alerts other road users to your presence. This compact solution ensures reliable visibility at dusk, in the rain, or in fog. Both lights are designed to withstand the demands of everyday riding, and their operation is quick and intuitive. Safety starts at the top – with your helmet.

FULL WRAP IN MOLD

Full Wrap In Mold technology creates a helmet that feels like one precisely engineered unit. Unlike conventional helmets, the EPS inner liner is completely concealed at the edges by the outer shell, giving the helmet a clean and refined appearance. But Full Wrap In Mold is more than just aesthetics. The fully wrapped edges provide better protection for the helmet's inner structure against mechanical damage and weather exposure, helping to extend its service life.

BENEFIT

Full Wrap In Mold

Perfect protection of the entire head circumference for maximum safety increase.

In-Mold Shell

Production technology, which makes the helmet of a single high-strength and lightweight unit.

X-protect

Increased security by increasing and intensifying the critical parts.

Dual Led light

Safety front white and rear red LEC lights.

Led light

Removable safety LED light provides go from visibility and increases passive protection for cyclists.

360 Wrap Fix

Innovative retention system for perfect fit and comfort. Evenly distributes pressure and prevents helmet movement even under high strain.

Ergo Fix

Fastening system that conforms to the shape and size of the head in two axes (vertical and horizontal). It can be manipulated with one hand using a pulling wheel.

Dual Fix

Sophisticated system that is most adapted to the shape and size of the head. It can be manipulated with one hand using a pulling wheel.

Easy Lock

Allows you to fasten / unfasten helmet with one hand.

Extra Padding

Spare removable and washable padding with bug net.

Bug Net

Prevents flying insects while riding.

CE - Safety Pro

We guarantee proved helmets safety.

GLOVES

ELASTIC PRO

ELASTIC PRO accepts individuality and uniqueness of each of us. R2 gloves are made from elastic materials in order to offer perfectly fitting gloves. That's why we use either a mesh or the Lycra. Netting itself is very elastic and also very well removes sweating. Lycra is a useful benefit in gloves when it is necessary high insulation properties while maintaining a sufficient degree of "breathing" materials.

EASY OFF

Technology of take down rings is a simple, but very useful benefit. Downloading sweaty gloves, their subsequent turning upside down, it's certainly not a popular discipline for athletes. Take down rings on gloves R2 greatly facilitate the whole process and so increase user comfort product again. They are also purposefully made from silicone so as to increase the slip properties of the glove.

DOUBLE GEL

The main benefit is the strategic placement of two gel layers in the most stressed areas of the palm (typically beneath the fingers and in the lower palm area near the wrist). This double layer acts as a shock absorber, effectively distributing the pressure applied to the handlebars and preventing painful pressure points and calluses. The dual-layer gel construction (often combining firmer and softer gel) absorbs a high percentage of vibrations transferred from rough surfaces such as bumps, roots, and stones into the hands. This significantly reduces fatigue in the forearm and shoulder muscles. Pressure on the carpal tunnel and the ulnar nerve can cause tingling and numbness. DoubleGel actively protects these nerve pathways, maintains optimal blood circulation, and prevents fingers from "falling asleep".

BENEFITS

Reflectiv

Reflective elements increase athletes visibility.

Elastic Pro

Made from a flexible material that conforms well to the hands shape.

Breathable

Gloves breathe better and carry off the moisture of wet and heat.

Touch Pro

Gloves for touch screen displays allow comfortable control of electronic devices.

Easy Off

Significantly facilitates removing.

AntiSlip

Anti-slip elements improve the safety of the handlebar grip.

Padded Pro

Padding reduces pressure sore in stressed areas.

Pro Gel

Gel reduces pressure sore in stressed areas.

Double Gel

Double gel padding eliminates bruises in stressed parts.

Join Protection

Thin gel padding at the finger joints to absorb shock. For rougher handling, more protection for hands during more predatory style of cycling.

Pro Wipe

Fleece surface for wiping forehead, nose and mouth.

AX Suede

Branded palm material specially designed for gloves that prioritize dexterity, strength, high abrasion resistance, breathability, flexibility, softness, grip and a comfortable hand feel.

Skintec

Premium palm material characterized by strength, flexibility, abrasion resistance, but at the same time softness and pliability

GripAir Flex

Premium palm material with high grip, softness, and flexibility ensures added comfort, cushioning, and abrasion resistance. Its anti-slip properties provide confident and controlled handlebar grip.

Thinsulate

3M™ Thinsulate™ is a lightweight insulation microfiber that provides exceptional warmth with minimal bulk. Fine fibers trap more air, dry quickly, absorb little moisture, and provide hypoallergenic comfort.

Heat Control

Combining breathable functional materials with a soft, skin-friendly lining provides balanced thermal comfort, ensuring excellent comfort in harsh conditions while protecting against cold after physical activity.

3D-Motion

The ergonomic 3D-MOTION technology is designed to conform to the natural shape of the hand. The anatomical cut enhances comfort, freedom of movement, and ease during a full day of skiing.

Tech Schell

Modern functional softshelled material composed of several layers suitable for production of breathable and very comfortable upper layers, which protect against water and wind.

Windbreaker

The combination of breathable functional material and soft, skin-friendly lining provides optimal thermal comfort, excellent breathability and protection against cooling after physical activity.

BACKPACKS

BENEFITS

Air Shield

Back system for quality ventilation, which increases wearing comfort.

EVA Pour

The parts of the backpack that are in contact with the body are softened with EVA foam for greater comfort.

Rain Cover

Raincoat for a backpack cleverly hidden in the lower part of the backpack.

Helmet Holder

Pocket with adjustable straps for carrying the helmet.

Chest Strap

Adjustable strap with a buckle connecting the shoulder straps for a more secure holding of the backpack on the body.

Tool Org

Storage organizer for the necessary tools.

H₂O Ready

Ready for a drinking bag.

Flexible Pockets

Flexible pockets for anything.

Ergo Straps

RErgonomically shaped shoulder straps for a perfect fit.

Vented Straps

Ventilated straps.

Waist Belt

Fastening belt in the hip area.

SHOES

BENEFITS

Dial Fast

The DIAL FAST system uses a mechanically precise rotary dial connected to a low-friction cable, which ensures even pressure distribution without deformation. Thanks to precisely adjustable regulation and fine-tuned compression, optimal fastening can be achieved at every point – even during the ride, with just one hand.

Eva Damper

EVA DAMPER is a key component in the construction of cycling footwear, providing active damping of impacts and micro-vibrations caused by contact with the pedals or riding over uneven terrain. The midsole is made from highly durable, shape-retaining EVA foam, whose optimized density and elasticity effectively absorb shocks during pedaling and reduce strain on the foot. The result is greater comfort, reduced muscle fatigue, and smoother power transfer to the pedals.

Cleats Ready

CLEATS READY means full compatibility with SPD pedal cleats. Thanks to the precisely defined cleat mounting zone and the stiff construction in the pedal area, the shoe provides immediate response to every movement without unwanted shifting or power loss.

Toe Guard

TOE GUARD adds a reinforced protective layer made of durable material that guards against scuffing, scratching, and wear. The tough, abrasion-resistant material prevents mechanical damage, and thanks to its firmly integrated design, the toe of the shoe stays protected even in the harshest conditions – without restricting movement or adding unnecessary weight.

SOCKS

BENEFIT

Moisture Guard

Ejects moisture perfectly for comfortable dry feeling.

Ergo Profile

Exact percentage of elastic material in composition guarantees the ideal ergonomomy to the socks.

360° Support

Elastic arch support creates perfect ergonomomy of a sock.

Light Weight

Extra light breathable material helps the sock to fit like a second skin.

Endurance Pro Pad

Targeted reinforcements protect toes and heel.

Sens Toe Seam

Flat toe seam reduces the risk of unpleasant pressure during intensive workout.

Airflow Guide

Vented mesh ensures ideal air circulation.

Achilles Pro-T Zone

Reinforcement in Achilles tendon area prevents inconvenient scratch.

Quick Dry

Functional material of the sock dries quickly even during the intense workout.

Compress

The first stage of compression to improve performance and recovery after sports.

R/L Anatomical

Anatomic design for left and right feet.

Cotton

Sporty cotton sock. Created by pleasant feeling from natural material.

Merino

Extra fine merino wool in the composition increases thermal comfort in extreme conditions.

Label	S	M	L
Size	35-38	39-42	43-46

The R2 socks are made from the highest quality materials and thereby ensure the most effective use of the functionality of polyamide, polypropylene, Elastane, and also natural materials. After detailed research specialist achieved the ideal percentage in the composition and GSM of various parts of the socks.

Socks are reinforced in the most probable to bruising parts to protect them and gain maximum comfort.

On the instep area, however, is situated very light mesh that guarantees excellent air circulation and reduces overheating of the foot in the shoe.

There is an ideal ergonomomy reached due to sewed Elastane in exactly defined percentage, which makes the sock fit to the foot like a second skin.

For increased comfort when riding a bike, there is a reinforced part in the point of contact of the foot with the pedal.
